

For as long as we can remember, capitalism has meant crisis - crisis for the environment, crisis for our safety, crisis for our survival. The wealthy have maintained and spread this crisis to make a profit.

NOW, CAPITALISM IS IN CRISIS.

The G20 will be meeting in Pittsburgh this September to try to save this disaster that they call capitalism. This is our chance to run in the streets together and light the fires of a new world.

FIGHT THE G20!
