

NEEDLE EXCHANGE SAVES LIVES

Last year, the Stanislaus County Board of Supervisors voted against a needle exchange program that would distribute clean needles to IV users and safely dispose of dirty needles. Hep C and HIV in the valley is spread primarily through the sharing of needles and a needle exchange program would drastically reduce such diseases. Because the exchange program was made illegal, several volunteers started an underground exchange. For their efforts, two volunteers Kristy and Brian were issued misdemeanors. Stand behind those that will do the work that the government won't! Drop the charges now!
