Global Day of Protest

Against Surveillance

"We call you to act now against overall Surveillance-Systems. Worldwide governments are about to demolish Privacy with Systems like TrapWire and Indect. Those network surveillance technologies sniff the CCTV cameras, government databases and the Internet to Identify people and make a profile of citizens, their families and their socializing," reads the call to protest. "They pretend to design those systems to secure us against Terrorism but the truth is they have been working on Surveillance-Systems way before the first Terrorists attacks happened."
