

10 Year Celebration of Micropower Broadcasting in the SF Bay Area

From an embryonic beginning in 1992, the effort to liberate and reclaim the FM broadcast airwaves from corporate domination and control has grown into a national and international movement. Since that time, hundreds of communities, acting to assert their free speech rights, have empowered themselves with inexpensive low power FM broadcast stations in an ongoing campaign of electronic civil disobedience. You are invited to take part in this celebration and join these efforts to take back the airwaves with easy to use and set up broadcast technologies.

Friday, April 26 – Celebration Party at AK Press
