**FOSSIL FUELS** are the lifeblood of the corporate globalized system we live under. Oil and gas fuels the capital- and resource-intensive transportation, mechanized agriculture and industry imposed on local communities in every corner of the earth by the World Bank, the International Monetary Fund, the World Trade Organization and the corporations and governments behind them. Control of oil rich regions around the world has been a key factor in US-led wars around the globe. And from Nigeria to Ecuador, Colombia, Burma and Richmond, California the extraction, transport, refining and burning of fossil fuels has left a painful legacy of human rights abuse, militarization, environmental devastation, widespread cancer and health problems. Consumption of fossil fuels is also the cause of catastrophic climate instability (droughts, floods, rising sea levels and greater natural disasters).

**PRESIDENT BUSH** has openly stated that “protecting our oil interests” is behind the deadly multi-billion dollar “Plan Colombia” war. This war includes massacres and widespread human rights violations, US military aid, aerial spraying of poison (fumigation), US training of Latin American soldiers at the SOA/WHISC, and counterinsurgency policies that are fueling the violence in Colombia, devastating the environment, and displacing tens of thousands of Colombians.

**EVERYWHERE** people are resisting and constructing practical, positive, ecological, just and directly democratic alternatives to a doomsday system fueled by oil. Please join us.
