

U.S.-Zionist Intelligence HQs Blasted, 14 Nov. 03

Muslim patriots blast U.S. and Israeli intelligence HQs in Riyadh and Kirkuk; Nasrallah pinpoints Jewish state as main target.

By Majdur Travail

In recent days both the FBI and the Mossad have become the targets of resistance operations, while Hezbollah Secretary General maintains that Israel itself must be targeted.

The Media Line reported that the Nov. 9, the Riyadh, Saudi Arabia, bombing was intended to target American FBI offices and that the Nov. 11 attack in Kirkuk, Iraq, was orchestrated against the Israeli Mossad.

The Riyadh, Saudi Arabia, bombing on 9 November 9, 03 was intended to target American FBI offices located in the bombed-out neighborhood, according to the Saudi daily Al-Watan. An Al-Qa'ida affiliated website said that the bombs targeted U.S. intelligence offices of the FBI in Al-Muhayya neighborhood.

In a separate, but related, incident an office bombed in the Iraqi town Kirkuk was reported to belong to Israel's Mossad intelligence agency. The MENA new agency reported "Mossad people" and a number of local Kurds, who were reported as collaborating with the Israeli agents, were annihilated by the resistance operation.

In other intelligence news, Indonesia's military has accused foreign countries, including Australia, of boosting the number of spies operating in their country. Indonesia's army chief, General Ryamizard Ryacudu, told an officers' graduation ceremony in Magelang, central Java, more foreign intelligence operatives from Australia, the United States, England and Israel were infiltrating the country.

"Many foreign agents are easily entering Indonesia. I have strong intelligence data about the entry of these foreign agents in Indonesia.

"This kind of war is cheap, it doesn't need big budgets and the aggressor will not be accused of violating human rights or accused as a war criminal," Gen. Ryacudu said.

The Indonesian government refused to confirm or deny the charge, saying it did not comment on intelligence matters.

Former Indonesian intelligence director Ac Manullang said:

"Agents from ASIS and the Office of National Assessments [ONA] were going under cover as foreign aid staff and even religious workers in many parts of the country."

The Australian aim, he told the Rakyat Merdeka [Free People] newspaper, was to gather information and keep watch over the “latent” threat posed by Indonesian Muslims. Other intelligence agencies like the U.S. CIA and Israel’s Mossad were infiltrating the same organizations to combat the Muslim resistance movement.

“Foreign infiltration can be done by intelligence agents from big countries, like the US, England, Australia and Israel,” he said. But he said the numbers of foreign agents were “top secret”. What is obvious is that there are many now,” he said.

Sheikh Sayyed Hassan Nasrallah, a veteran anti-Israeli analyst, recently commented at the International Conference of the Arab and Islamic Media, in September 2003, that Israeli intelligence was capable of spinning a wide web, but must, nevertheless be confronted in the Palestinian theater.

“The Israelis today are going to Iraq. There is a powerful Israeli secret service in Iraq at present. Whenever an American military base or security base exists, in Iraq, the Gulf, or any other Arab and Islamic country, an Israeli military and security base exists.”

Nasrallah maintained that, “we must deal with this issue according to this principle and this fact and we must not deny it or avoid admitting such issue.”

Instead of facing Israeli intelligence, or American intelligence for that matter, in Iraq, India, Azerbaijan, or Eritrea, or the Sudan, et al; Nasrallah held that Palestine was the necessary epicenter of the anti-U.S. and Zionist insurgency.

Nasrallah said,

“Instead of being bled and occupied and instead of dividing our efforts across all of these arenas, why don’t we centralize our battle and our effort within the Arab and Islamic world beside our Palestinian people?”

It stands to reason, of course, that an end to Israel means an end to Israeli conspiracies. While the United States remains the #1 obstacle to world peace, the liquidation of the Zionist project would transform the entire geopolitical landscape and remains within the reach of international anti-Imperialist forces.

Nasrallah lauded the role of the Muslim and anti-Imperialist media claiming outright that:

“We have reached without any doubt the stage where the media is capable of producing the event. Concerning the media relation to the resistance, I would like to say also, from a position of experience, that this relation is deep and strong.”

The Hizbollah organization revolutionized the role of the by embedding Muslim journalists in its resistance operations against Israel and frequently embarrassed the fascist genocidal apartheid dictatorship “Israel” by releasing combat footage to major media sources in order to refute Zionist lies about their casualties. Israeli state media, for instance, would claim that Golani soldiers died in “car accidents” when they were in fact routed on the battlefield. Hezbollah event went so far as to claim that their satellite television, Al-Manar, was “the secret weapon of the Intifada”. Hezbollah founded its own Satellite television and radio networks which later inspired the world renowned Al-Jazeera of Qatar.

Nasrallah claims, “The media represents one of the most important weapons of the conflict, battle and resistance, due to the impact it leaves behind on the enemy, friend and the resistance itself.”
