

STOP UCSC EXPANSION!

UCSC's new Long Range Development Plan:

Proposes unsustainable growth and disregards the concerns of Santa Cruz residents. 4,500 new students promises overcrowded, unaffordable conditions, as housing, traffic and water resources are already nearing a point of crisis.

Enables the restructuring of UCSC in to a corporate-funded research university, at the expense of it's educational mission and unprofitable departments like the arts & humanities.

Would destroy 120 acres of beautiful forest in the upper campus. Alternative, environmentally superior land use options exist.
