

APPENDIX

COMPLAINTS OF ADVERSE REACTIONS TO AERIAL SPRAYING IN MONTEREY AND SANTA CRUZ COUNTIES

Submitted by Helping Our Peninsula's Environment (HOPE)

January 3, 2008

TABLE OF CONTENTS

1. Press Release	(see attached documents)
2. Executive Summary. . .	(see attached documents)
3. Quotes by Elected Officials and Community Leaders . . .	(see attached documents)
4. Methodology: How the Complaints were Compiled . . .	(see attached documents)
5. Recommendations & Alternative Solutions . . .	(see attached documents)
6. Appendix (See this 192-page compilation)	
A. Citizen complaints of adverse reactions sent directly to the CDFA (317 total)	p. 3
B. Doctors' reports sent to the Santa Cruz Agriculture Commissioner (36 total)	p. 4
C. Citizen complaints sent to ReactiontoSpraying@yahoo.com following the October & November aerial spraying of Monterey and Santa Cruz areas (39 total) . . .	p. 5
D. Complaints of illnesses submitted by citizens via an online petition at www.stopthespray.org (49 total)	p. 26
E. Symptom reports sent by citizens to Reaction to Spraying's P.O. Box (38 total)	p. 37
F. Citizen reports of illnesses collected via petition circulated at a Santa Cruz homeless shelter and in downtown Santa Cruz (37 total) ...	p. 81
G. Citizen complaints sent to ReactiontoSpraying@yahoo.com and the Reaction to Spraying mail box following the aerial spraying in September of the Monterey area (134 total – these were escalated to the state agencies in October)	p. 90
H. Citizen complaints of adverse reactions posted on the Santa Cruz Sentinel's online forum (these are not counted in the total number of complaints)	p. 177
I. Citizen with chemical sensitivities, immune deficiencies, asthma and respiratory ailments who pleaded with the state to halt the spraying (these are not included in the total number of complaints and were collected by www.stopthespray.org) . .	p. 183

**317 Complaints of Illnesses Received
Directly by the CDFA, as described in
correspondence below with Mike Lynberg of
Pacific Grove**

-----Original Message-----

From: LBAM [mailto:LBAM@cdfa.ca.gov]
Sent: Thursday, December 20, 2007 2:28 PM
To: mlynberg@roico.com
Subject: Fwd: Question regarding citizen complaints -- please answer today if you can

Mr. Lynberg -

There are **52 Citizen Illness Reports** - 44 from Monterey County, 7 from Santa Cruz County, and one from Santa Clara County. The Citizen Illness Report is the format that generates the most comprehensive information.

Additionally, we have received **221 Citizen Illness Complaints** - 117 from Santa Cruz County and 111 from Monterey County. The Complaint format is more informal and may or may not include a caller name, contact information and a complete list of symptoms.

Also, we received **44 e-mails** complaining of a variety of symptoms. Several are duplicates.

CA Department of Food and Agriculture
Office of Public Affairs

>>> "Mike Lynberg" <mlynberg@roico.com> 12/20/2007 3:28 PM >>>

Thank you very much for this. A quick follow up question -- Do the 111 Citizen Illness Complaints [in Monterey] include the 117 or so I sent in a PDF that had been gathered through ReactiontoSpraying@yahoo.com, and the corresponding P.O. Box? Or are these separate?

Thanks again,

Mike

We are citing complaints made directly to CDFA.

36 Physician Reports of Illnesses Reported Directly to the Santa Cruz County Agriculture Commissioner's Office

In a phone conversation on December 13, 2007, Sean Fields, an investigator for the Santa Cruz County Agriculture Commissioner's office, reported to Mike Lynberg, a citizen of Pacific Grove, that his office had received 36 reports from local doctors of various illnesses their patients had suffered possibly as a result of the aerial spraying. Mr. Fields said he is actively investigating the reports and will escalate them to the proper state agencies when his investigation is completed.

23 reports of illnesses by Santa Cruz area citizens following the first round of spraying there in November 2007. These were received by email via ReactiontoSpraying@yahoo.com and are reported here for the first time on January 3, 2008

Note: Last names are removed to protect citizens' privacy; please contact Mike Lynberg if you need more information.

Susan _____ *[last name redacted to protect citizen's privacy]* wrote:

Location: Soquel

Time: Began about 9 p.m.

Reaction: Mild stinging eyes (planes were back and forth overhead since about 8-8:30); eyes feel slightly swollen and slightly blurry vision.

Unpleasant breathing in the slightly scented spray

Contact me if you need more info.

Tara _____ wrote:

Hello, I would like to report my adverse reaction to the aerial sprays that took place from 8 p.m. to 1:30 a.m. on November 8th in my area. I woke up with a mild headache, burning eyes and a runny nose. I am perfectly healthy, so these are not symptoms of a cold or flu.

I ride my bicycle to work because I do not own a car. Even though I wore a mask, my headache grew worse and I developed a sore throat. I had to ride my bike home as well. I am eating a balanced diet, very high in dark leafy greens, and taking several herbal supplements in attempts to offset these symptoms. But I still have a headache, burning eyes and a sore throat.

I am very saddened and even angered that this spray was allowed to be blanketed over residential areas. The airplanes flew directly over my neighborhood 30+ times last night, not only causing aggravation, but keeping us awake until 1:30a.m. Having the adverse reaction I have experienced today, only makes this unnecessary toxic spraying more aggravating. Please do all you can to stop this from continuing!

Sincerely,

Tara _____, Capitola

M M _____ wrote:

My eyes started to burn as soon as I drove into Santa Cruz last evening 11/9 around 5 pm. It was intense. Itchy eyes, burning eyes, lungs were irritated and reactive. Felt acidic in my eyes. I felt scared. My head also felt effected. Numb dull headache. The eye tissue swelled and was irritated under the lid and around the eyes. My eyes felt like there was a very strong solution of sodium in the air. My eyes, lids and throat were irritated and glands slightly swelled. The burning eyes were not as bad indoors as I had sealed up my home before they sprayed. I can feel the effects right now as I am inside my home. My eyes are slightly burning. My lungs feel an irritating burning. Head feels dull and slow. Sinuses are swelled and burning. Slight nauseas feeling now as I have been exposed for 2 days.

Nothing I want to EVER experience again from the air I breath in Santa Cruz. This is very

scary and an unbelievable attack against our health and well being.

I am right at the buffer zone of 24th and Portola Ave S.C. and yet I can feel the effects. Outside my eyes still burn and slight face nerves effected. Not as severe near the coast but as soon as I drive inland my eyes and throat get even worse.

Marilyn _____

Jeffrey _____ wrote:

Since the spraying began I have endured greatly intensified allergy symptoms, especially asthma. I moved to the coast in large part to protect myself from the many allergens of the central valley and consequently my symptoms greatly decreased. Improved medicines over the last few years have kept most symptoms at bay. Now I have continuous breathing problems that trigger frequent coughing spells.

Any air-borne irritant will have this effect on irritated lungs, even if the irritant is not an actual allergen.

These asthma problems have interfered with my ability to do my job.

Jenny _____ wrote:

I developed a sore throat the day after our home in Santa Cruz was sprayed for the LBAM. I don't know if it is because of the chemicals or a coincidence, but I can't help but wonder and worry. I have cats that may have been tracking the chemicals into the house and onto my bed. I also had to work outside the following morning. I can't go to a clinic to have it formally documented because I have a young child and finding childcare for her is challenging. I hope this email can account for some kind of documentation.

Thank you,
Jennifer _____

angela _____ wrote:

I was riding my bike home from approximately 9:30 to 9:45 on November 8th in Santa Cruz. I had to ride on Seabright Avenue from the East Cliff to Gault Street and went under two passes from the planes.

I did not notice an immediate reaction. The next morning, November 9th, I had a slight tremor in my arms and hands for about ten minutes at 9:00 am. I felt a burning sensation in my throat while a passenger in a car at about 4pm. This cleared up when I had a beverage. That evening my vision was quite blurry. I noticed it was blurry at about 9pm when I turned on my computer monitor. I needed to wear my reading glasses in order to read the screen. This is not typical and my visions was back to normal the following morning of November 10th.

I have not noticed anything of significance on subsequent days.

Thanks for warning & info: We were hit with LBAM spray between 2:00a.m. and 4:30 Friday morning. I smelled poison gas coming under the door burning my eyes, throat and sinuses. After the second pass of the plane I couldn't breathe or smell anything but developed a throbbing headache. The plane continued to pass back and forth over our roof for over two hours making my head feel like exploding. I called CDFA telling them that I needed gas masks for my family and evacuation assistance. I was told that I could not make a complaint over the phone, but would have to have a doctor make the complaint for me. My six year old daughter woke visibly shaking, covering her right eye with her hand, telling me that her eyes were burning. All of my children had bloodshot eyes, and complained of burning throats and headaches. My youngest children and I stayed home from school. I've spoken with many other parents with similiar reactions. I cautioned my oldest daughter not to go out into it at 8:00am as the air had been saturated with poison within 3 hours before she leaves for school. She went to school despite my warning not to go out in it, and is now the most ill of any of us. She still has a headache and sore throat Monday. My headache lasted until sunday. We also have a report of a blinded hummingbird flying into a pole. Californians are caught in the crossfire of the war on nature. Please stop them from poisoning all life. Californian's must sue Arnold Schwarzenegger for his plan of poisoning us with his Checkmate biochemical campaign donation arrangement. He has been empowered to turn our homes into gas chambers by CDFA. The time has come to tell him to stop spraying immediately or step down from public office. People are walking around looking stunned in the grocery store, accidentally running into each other with shopping carts. Don't let them damage and mutate all life in the name of an apple crop. Tell them to use sticky traps if they must experiment with pheromones. Recall the Governor, Don't them continue to experiment on California.

I have been sick sunday and monday after spending time outdoors after spraying in my area. I live in the Live Oak area of Santa Cruz. I am a 61yo gen. healthy female who rarely has ever had upper respiratory sx. you can email me

treesplease@yahoo.com. I was hoping it was just a coincidence, but a friend suggested I get tested. is there a test to determine if the spray is in my system? thank you for your help. Suzanne

M M _____ wrote:

Friday night 11/9 my eyes burned very bad as I drove back into Santa Cruz. Was this really happening. It's hard to believe.

I had sealed up my home so I was not effected inside my home but when I drove up to Felton Saturday night Nov 10th my eyes burned the whole way up Graham Hill Rd which was a surprise since it was raining. I thought the rain would rid the chemicals from the air.

I went to bed last night 11/13 with the distinct burning of the surrounding eye tissue still like a very strong salt solution had been poured in my eyes. I had taken off the plastic from my doorways which I now think was premature and a mistake since I woke up with burning eyes and a very bad chemical taste in my mouth and down my throat this morning 11/14.

My skin feels a slight burning now which I hadn't noticed before. It almost feels like nerve tingling or burning. My nervous system seems effected.

I have a slight nausea feeling in my stomach and my head feels chemically effected. My mouth is sort of chemically dry yet seems that the chemical taste is causing me to salivate unusually. The taste in my mouth is really bad.

I can feel the chemicals in my system. I am not feeling very well. I know nothing can be done by going to the doctor and I can't afford to do that anyway. Are we going to just be poisoned! This is an outrage that this has actually been allowed by any court system or government body or any group of human beings. What kind of stupid human being would OK anything like this to be done to us!

Are we going to just be poisoned!

Good day,

I was just informed about this email address and I would like to report the inhibiting reaction my husband is experiencing. Currently he gets multiple headaches during the day, and has trouble focusing on simple tasks like reading or writing. This condition began a week or so after the initial spray over ocean st. area. It continues to worsen and we are scheduled to see a doctor on Friday. I am very concerned after learning that the chemical is a time release form, which could cause even more damage to our health. I am outraged that this information was not published prior to the spray. I would like this to be added to the mounting evidence against the spray, given that many other Santa Cruz residents have experienced similar conditions.

As for my reaction to the chemical, I believe I am suffering mild eye irritation and nasal congestion. I haven't experienced these problems in years and they arose in sync with my husband's condition.

Thank you for your time and help.

Sincerely,

Christine _____

To whom it may concern,

I live in Aptos, California, and while not in the area of direct overhead spraying, I do drive through and spend time in areas that were. I am not sure of the dates that Aptos was sprayed due to delays from the presence of fog. However, on Thursday, November 15, I started to think I was coming down with the flu. I experienced waves of dizziness and nausea, not debilitating but very uncomfortable. These symptoms progressed into fatigue, headache, numbness and tingling in my arms, aching muscles in my neck and back, and eye migraine. I have a tendency to eye migraines when I have a reaction to something I have eaten or been exposed to. As time wore on I realized this was not flu, but a condition I had never experienced before. I became very worried that perhaps something is seriously wrong.

Today is Monday, November 26, and I still feel slight dizziness and nausea, and fatigue. Needless to say my Thanksgiving was less than pleasurable, and I am beginning to think I have a reaction to the Checkmate spraying for the light brown apple moth. The thought of having to experience these symptoms as an ongoing part of my life due to the ongoing spray program is intolerable. Since when has the agricultural industry become more important than human health? Agriculture is for human health, at least it used to be.

I would appreciate any suggestions you may have to protect ourselves from future spraying, and for detoxification. As I understand it, Checkmate stays active for 30 days, which makes leaving the area impossible.

Sincerely, Lucette _____

Fri, 14 Dec 2007 17:22:08 -0800

YOU MUST NOT SPRAY SANTA CRUZ AREA AGAIN !!!

I barely made it through the last time. I was too sick to call and complain. I am sensitive to smells, but I have never encountered anything as insidious as this. I know, without a doubt, that there will be future illnesses attributable to this spraying. I think everyone must understand that even though this substance appears to be harmless at the basic level, no one can predict or measure the confluence of environmental factors that can occur in a particular place at a particular time. I would surmise that spraying *anything* into the air that

we breathe could cause medical distress to some portion of the population. Isn't that why we are all concerned about CO2 emissions and global warming? I read somewhere that 1 out of 4 babies born in the US has lung abnormalities. That's due to what we breathe, folks! Not only must there be a better way, but there have been better ways for decades! Come on; there should not be any spraying of anything anywhere! Don't make me sick again, because as soon as I recover...let's just say I have a mighty pen!

Wed, 12 Dec 2007 20:57:58 -0800 (PST)

I went out of town on November 4th and returned home on Monday, November 19th to try and avoid exposure to the aerial spraying in Santa Cruz. I live in the Pleasure Point area. On Tuesday I felt okay. On Wednesday morning I woke up with stomach pain and it stayed with me all day. It was a kind of intense gnawing pain not in the abdomen but right in the stomach. I did not otherwise feel ill before this and could not attribute it to anything I ate. I believe it was a reaction to the spray. It was a type of pain similar to what I experienced years ago when I took NSAID's and developed bleeding in my stomach. I have not felt this pain since discontinuing these types of medication about four or five years ago. By Thursday morning the pain was mostly gone.

"michiyo _____" <_____@hotmail.com>

Wed, 12 Dec 2007 09:22:37 -0800

My body started hurting middle of that night, and the pain woke me up. I heard the airplane flying over my house every ? minutes at dinner time until I went to sleep.

When I woke up from the pain, I still heard the airplane. I didn't know the airplane was spraying until Friday morning. Later I developed soar throat for days. My daughter went for a walk in Saturday afternoon and got wet from the rain on the way back home. When she came back, she said it was odd that her eyes hurt from the rain. She didn't know possible reactions from spraying at all.

I've been very sensitive to chemicals in foods and water for years and became extremely sensitive to the air quality since the spring in 2005. When all doors and windows are closed, I had strong reaction from outside air in the past when something unusual was happening around the house.

I wonder spraying still happens if someone would have similar condition to mine who order spraying or not.

Tue, 11 Dec 2007 00:23:11 EST

Hello

I am writing to report symptoms that I have never before experienced, which started after the spraying. I was working at the harbor on the night they sprayed and no doubt came into contact with the spray, as the plane was obviously going back and forth around and above us for several hours.

Symptoms: sores in nostrils and nasal drip - also a bloody nose for the first time in my life.

Thank you

this is a duplicate of the letter i sent
to my physician randy baker, documenting
the adverse health effects i suffered from checkmate
spraying. dr baker did file the proper
form with the santa cruz county health
department, but i thought just for the record
i should also send you folks a copy of my complaint

19 November 2007

Paulina _____

Santa Cruz, CA

95060

831) ____ - _____

Dear Randy Baker and Cindy Qauttro

As you both know, I am an established patient in your practice. Among other health issues I deal with are chronic respiratory problems, such that I had breathing difficulties this past fall when smoke from the Lick wildfire blew into Santa Cruz. These lifted for me within a day or two of the smoke blowing out to sea.

I originally moved to Santa Cruz from San Francisco precisely because my fragile health demanded cleaner air. That I am able to maintain some level of normal function is in part a tribute to living in the relatively clean air of Santa Cruz.

I have been very concerned about the Checkmate aerial spraying for the Large Brown Apple Moth; so to be on the safe side, I decided to head out of town during the week the November spraying was supposed to take place.

I returned to Santa Cruz Saturday November 17, a little more than a week after the saturation-spraying of Santa Cruz took place in my zipcode.

Alas, within 30 minutes I was greeted by my classic symptoms of respiratory distress: shallow rapid breathing; painful spasm of the muscles of the diaphragm; overall shortness of breath. There was also the attendant nausea, bad metallic taste in my mouth, and GI spasticity.

I had been -fine- when I left Berkeley (which had been my refuge) that morning; I was NOT fine 30 minutes after I arrived in Santa Cruz.

These symptoms had nothing to do with a flu-likeinfection or anxiety; I have had chronic respiratory problems most of my adult life, and I know it when I experience it.

To be fair, the symptoms have abated over the last 48 hours, and today they have mostly cleared.

Is the State of California ready to pay for me to leave town one to two weeks every months for the next two years? Pay for my relocation costs if Santa Cruz becomes uninhabitable altogether for me? Pay for my added healthcare costs, and possible total disability?

Kindly,

[@aol.com](#)

Mon, 10 Dec 2007 13:24:24 EST

What I can say is that my periods have been shorter since they started spraying in Monterey in September. I live in Aptos. I have a regular 29-30 day schedule and am like clockwork. My periods since September have been 25 days. That has never happened to me -- I am NEVER early -- may be a day or two late but I am usually right on schedule. This month I think I am back on schedule (it is one month since we were sprayed here). I will know better if the spray is responsible if this happens again with the next spray. I think someone should contact some local OB/GYNS to see if there has been an increase of irregular menstrual cycles since September.

Mon, 10 Dec 2007 09:02:00 -0800

My wife and 9 year old daughter both felt mildly ill (nauseous) the day immediately following the spraying over Aptos. Neither one of them is close to being a "worry wart" or hypochondriac. We didn't even give it a second thought until we tried to figure out what might be making them feel ill. Then it dawned on us that the feeling coincided with the spraying.

I have no idea if the two are connected but thought it would be worth voicing my concern.

John _____

"barbara _____" <____@cruzio.com>

Mon, 10 Dec 2007 00:07:39 -0800

I also had a sore throat and headache, which I rarely get after the spraying
It is criminal to spray with an untested product and should be stopped immediately
I am willing to join any legal actions as this is undemocratic as well as potentially a threat to the
health of all citizens including our animal and plant life. There were no birds for several days
and the numbers have dropped.

Thu, 20 Dec 2007 20:24:17 -0800 (PST)

Hi,

My name is Cynthia _____ and I would like to report a rash I developed from the LBAM spray. I live in Live Oak in Santa Cruz. I had this rash for a month and finally went to see the dermatologist yesterday, but had to see his Nurse Practitioner since I couldn't see the doctor until the middle of January. I took the OEH 700 form, but the NP refuse to sign it. I developed this rash after doing yard work in my own yard where I have lived for 23 years. This has never happened to me before and it happened about 1 week after the spraying. Then this past Sunday, my husband and I did some more yard work and right after we finished, I had developed a brand new rash all over my forearms, upper arms, neck and chest. I know the spray caused it, but could not convince the NP. What do I need to do now. I've heard that you are collecting data on this so I would like to be added to your list.

My phone number is 831-____-_____ and cell phone is 831-____-____. You now have my e-mail address so I wait your response.

Thank You,

Cynthia _____.

"sunita _____" _____@hotmail.com

Sun, 23 Dec 2007 04:46:38 +0000

My name is Sunita _____, I am 45 years old and a resident of Santa Cruz County, California. On Thursday, 11/08/07, my neighborhood was aerial sprayed repeatedly for most of the night. A window was inadvertently left open behind some curtains and we were directly exposed to the spray until we realized it and closed it. The next morning, my friend and I began to suffer from acute respiratory problems including shortness of breath, a burning, inflamed sensation in the lungs, chest pains, sore throat, dizziness, dry cough, and tachycardia (rapid heart beat) muscle aches, intestinal pain, headache, nausea and fatigue. That evening, I went to Doctors on Duty. I was very concerned because I suffer from chronic immune disorder. I was not experiencing these symptoms before the spray. I was advised by the doctor that I should leave town because I was probably reacting to the chemicals, and this would continue as long as it was in the air. This doctor did not file an official report at the time. He prescribed me an inhaler which did nothing to alleviate my symptoms.

After five days, my friend and I continued to feel ill and we both saw my family doctor who filed suspected pesticide related illness reports for both of us and faxed them to the proper authorities. After 11 days, I continued to suffer from respiratory problems and burning chest pains, and began to have high blood pressure, a symptom I have never suffered from before. Almost unable to breathe, I went to the emergency room at Dominican Hospital. They said that my blood pressure was 164/120. My bronchial tubes were in spasm and I was given a breathing treatment for patients exposed to toxic fumes. The doctor told me he didn't know what the exposure symptoms were for that chemical and did not have time to research it. I was diagnosed with bronchial spasm, esophageal irritation, and possible chemical exposure. He referred me to a lung specialist. It has now been 8 weeks since they sprayed and I continue to have sore lungs, chest pain and a dry cough that I didn't have before.

I am being forced to leave my home and community of 30 years, because I cannot tolerate having to go through this again. Being sprayed every 30 days, as the CDFA is planning to do, will be a death sentence for me if I stay here.

"Jane _____" _____@sbcglobal.net

Mon, 31 Dec 2007 15:01:44 -0800

Hi: picked up your flyer at Way of Life in Capitola. I've called Sam Farr's office and expressed my viewpoint about not spraying, I've also written the Governor (again) about this.

You asked if any of us had reactions. All I know is we took a LOT of precautions, we live on the cliffs where they didn't spray much but the brain fog has been ridiculous. I attributed to our Holiday season but who knows, it's almost like I am going nuts here. My husband has had extreme lethargy. Tightness in chest and a feeling that I'm about ready to have a heart attack has also been prevalent.

Anyway, if there is a form I am to fill out, please let us know?

Jane and Tim, Capitola area

18 reports of illnesses by Monterey area citizens following the second round of spraying there in October 2007. These were received by email via ReactiontoSpraying@yahoo.com and are reported here for the first time on January 3, 2008

Sun, 28 Oct 2007 19:12:42 -0700 (PDT)

"LISA _____" <_____@sbcglobal.net>

Dear Mr. Lynberg,

I am a 41 yr. old female in excellent health. I am rarely sick and do not take any medications. If I am sick, I notice it right away.

I woke up this morning with definite "flu-like" symptoms because of the aerial spraying. I noticed it as soon as I woke up. I felt tired. When I looked in the mirror I was shocked to see my eyes were puffy and swollen. My eyes were wrinkled and red appearance. I did not connect this with the spraying at the time.

I proceeded to get ready for the day. I began to notice other things. I had to blow my nose several times because my sinuses were runny and congested. I had a dry and irritated throat and I started to sneeze. I has excessive nasal drip and in essence just felt crummy.

By the time I got to work, I had a headache on the right side of my head that lasted most of the day. My eyes felt sensitive and burned with irritation. I still noticed this sensitivity at 2:00 pm in the afternoon.

When at work another employee mentioned how badly she felt. She was not aware of the aerial spraying that was taking place at night. She said that last evening she had experienced difficulty breathing and had a tightness in her chest that she was not accustomed to. Her eyes were visibly irritated and red. She also mentioned a sore throat.

I mentioned that aerial spraying was being done and for her it was an ' ah ha ' moment, and she said this is what was causing her discomfort because she is a young and healthy female in her early 30's and not prone to sickness.

When I returned home in the evening I checked in with my elderly mother. She said she felt like she was coming down with the flu. She described puffy swolllen eyes, achiness, and a sore throat. She said she felt awful and believed it was the spraying too. I noticed that she sneezed and coughed alot.

Lastly, I have a small pet in the household and when he does not feel well, he will remove himself, curl up in a corner and just be still. I cannot ask what his pains are, but I know when he is not feeling well. After the spraying he does not act himself and seems unwell.

The officials cannot say that this spraying is not harmful to us. I have seen in my own small circle how it is affecting us. The spraying is affecting the people of the Monterey Peninsula. and I believe this poison continues to affect us after the spraying as it lingers everywhere.

Please add my letter to your list of complaints and please continue to push for the citizens of the Monterey Peninsula to stop the aerial spraying that is taking place throughout our community. It is an Outrage that this is being allowed when no conclusive health studies have been done and it is an Outrage to do this to people. We are not lab rats. We have lives, families, children and pets that are hurt by this.

I have checked various web-sites and see that spraying is scheduled to continue in Monterey County for 9 consecutive months beginning in March 2008. What a gross outrage and let down to the people. Our city officials should be embarrassed and ashamed for allowing this to take place.

Thank you.

"SUMMER _____" <_____@sbcglobal.net>

Once again my daughter "mysteriously" fell ill the day after we were sprayed. She is having the exact same symptoms as last time, headaches, congestion, runny nose, coughing, sneezing and stomach aches. She was sick for a month after the last spray and has been the picture of perfect health this whole month until Thursday afternoon (the 25th). My husband and I both experience minor throat irritation but nothing compared to what our 2yr old daughter goes through. We will be seeing the Dr. this time and I am furious!

"peninsulamom" <_____@sbcglobal.net>

Hi,

I was given this email address to report symptoms possibly identified with the spraying of Pacific Grove. I am currently suffering with severe symptoms of an allergy attack. Normally if I have an allergy attack, my medication is able to help relieve the severity. I've been having the normal allergy issues but on the morning of Oct 27, my symptoms have worsened and continue to intensify. They are as follows;

VERY sore throat

Sneezing up to 20 times a day in (3 or 4 sneezes in a row)

VERY itchy eyes and soreness around eyes with no relief after allergy

eye drops

Scratchy roof of mouth

Nasal discharge and difficulty breathing.

Difficulty sleeping due to above symptoms with affect my concentration during the day.

Please forward this information to the appropriate person. I plan to visit my allergist tomorrow and request he report my symptoms to the appropriate health agency.

I hope this doesn't last long! It's very uncomfortable and awful.

"L. _____" <____2006@netscape.com>

I'm a woman disabled with severe Environmental Illness. I'm MUCH more sensitive to toxic chemicals than most. I normally walk on Rio Del Mar beach almost every day. I walked there two days last week when they were spraying Seaside, etc. By the time I returned home, I had a migraine that no pain med would touch, dry hacking cough, tickling throat, blurry vision, felt like my head was in a vice grip, "brain fog" (cognitive brain dysfunction/brain edema), digestive distress (runs), burning skin on my face....I could go on, but I think you get the picture. Since I walk there almost daily, this was absolutely never the way I felt at any time upon returning home. These symptoms continued to varying degrees, and have not stopped at all, ever since my exposures! In fact I am having difficulty sleeping - I awaken every two hours or so. I aawaken with my body "burning" and a migraine that only fresh air will help - I drive up to Bonny Doon or Davenport or above to fine "clean" air. When I return to Felton, where I live, the symptoms never completely go away, even though I've stayed away from Rio Del Mar for five days now. I drove there today, thinking I would walk again.....I opened my car door and got back in a closed it and left immediately! I'm planning on leaving the county when the spraying is done here in SC County. I will probably be forced to move out of the county, since the spraying will continue indefinitely.

I have had my blod tested about 15 years ago, and discovered my DDT levels were .3ppb - the "normal allowable" is .003 ppb. Ten years later at age 55 I had the DDT levels tested again.

Though good living and organic food, I managed to lower the levels to .1ppb (still not .003ppb).!!!! As kids wer used to run behind the trucks spraying DDT in our neighborhood because we were told it was "safe"....like hell it WAS!!!! Agent Orange, Malithon, Gulf War Syndrome, the list is very long of the ingredients we were told were "SAFE". Mercury in childrens vaccines was "safe", and yet we now have 1 in 150 babies with autism.

WE DON'T KNOW WHAT THESE INGREDIENTS WILL DO TO OUR WORLD AND THE INHABITANTS OF IT. WHAT WILL WE TELL OUR GRAND CHILDREN IN TWENTY YEARS IS THE REASON THEY HAVE BRAIN CANCER, OR SOME OTHER AILMENT WHICH COULD HAVE BEEN PREVENTED - BUT WE FAILED TO STOP THE INSANITY????!!!!

DON'T SELL YOUR SOUL FOR A BUCK OR A PAT ON THE BACK. YOU ARE RESPONSIBLE FOR THE OUTCOME OF THIS SPRAYING IF YOU DON'T DO SOMETHING TO STOP IT!!!

"jennysue ____" <____@yahoo.com>

To whom it may concern,

Although they are telling us that the spraying is non toxic, I continue to have adverse reactions every time they spray. I wake up the morning after with a very sore throat, have trouble breathing, and headaches. Something really needs to be done.I am tired of being sick from this. They are going to spray the area where I live(Prunedale) tonight. Can't something more be done to stop this?

Afraid for our health,
Jenny _____

"hotchili9pepper" ____@yahoo.com

metallic taste in mouth, sudden but mild and various symptoms hit, mouth, tongue, and tonsils are cotton dry, lump in throat, knot upper stomach between ribs. Left area - 20 minutes symptoms disappeared.

Returned to area 4-5 days later. Symptoms returned off and on. When leave the area, or go to beach, return back to normal in 15-20 minutes (this never happened before to us, and is not an allergy or sinus - which don't disappear when getting fresh air.)

Nauseous at times. Sudden onset again of symptoms, hard to breathe, lungs hot and ache. Sit up and drank water. Feels like throat constricting. Called doctor - they said not treating - that it was only pheromone spray and will not hurt you - that it's probably just allergies or a flu.

Can be feeling fine - very upbeat - travelling to a different spot - on peninsula - then BOOM - hit with dry throat, cotton mouth, incredible need for water, very thirsty, skin seems dry, eyes dry, tired, achy, hard to take a deep breath, lymph areas swollen, weird taste in mouth, lungs - slow to breathe - getting mad that no one believes us. Went to office building with great air conditioning - filters - and felt better in 20 minutes. Why? Don't know - maybe has to do with lungs? Doctors should be treating that. But hard to get to them to listen.

Vomiting - off and on for one of us. Lost 15 lbs after a few weeks. This during 2nd month of spray. Call hospital - they refuse to treat for pesticide - but say they can only treat the symptoms. They have no antidote. Hard to breathe. Leave the State for a week. All symptoms disappear!

2nd month of spraying - affecting more people and us in throat, sore infected tonsils area, slight nauseous, ill feeling. Need to go to beach more often. Adjusting to being sick off and on. Tired.

Which, makes us believe that by breathing in the 30 - day release of the pesticide affects us. So, by staying "INSIDE" the 2nd time, though different spray, the symptoms were not as off & on. But different. Keeping tract - journal - too long to type all. Hoping this will help Santa Cruz area. And, by March when we are sprayed again for 8 times, we will have an antidote or have stopped this madness.

Decided to research more - and find answers.

_____.@aol.com

My Mom who live in Josselyn canyon Rd. has gotten severe respiratory issues immediately after each spraying. She also recently started getting terrible rashes all over, again right after the spraying. We are thinking her dog, who of course goes out into the bushes to go potty, has picked up residue from the bushes and brought it back into the house.

I think the spraying is causing these issues to appear.

_____.@aol.com

Hi:

I visited the central coast of California towards the end of October. My stay was actually October 23 to November 1. We flew into San Francisco on October 23 and drove down the Coast (Route 101) to Santa Maria on Wednesday, October 24. Upon arriving I noticed that I had a slight cold. By Wednesday evening I got very sick with a fever and very bad sinus infection. I went to a medical facility in Santa Maria on Thursday, October 25. At this facility I was given antibiotics. which I took for 10 days. We

stayed in Santa Maria until Saturday, October 27. On that Saturday we drove back up the Coast via Route 1 and stopped at the Hearst Castle. I noticed that day that on the bus coming back from the Castle I had a severe coughing spell. The windows were open and I stated to my husband that there must be something in the air that is aggravating my respiratory system. We then drove to Monterrey where we stayed for two nights. While in Monterrey I had a worse reaction with more coughing and my eyes became very red, swollen and my lids burned. I again went to a Medical facility in Monterrey and saw a doctor and asked him what was in the air that caused this reaction. He said that a lot of people in California have allergies and gave me Clarinex D, Nasonex, and a cough suppressent (phenergen with codeine). I continued to cough the whole time I was in California.

We flew home on November 1. As of today, November 9, I am still not quite back to normal. At night I still have coughing spells and my lungs are still somewhat congested.

Upon returning to East Coast where I live I have been reading about all the spraying that California is doing for the Apple Moth. I understand that they sprayed in Monterrey around the time I had my reaction.

I want to report this incident to you because I know that there is a lot of controversy concerning this pesticide and wanted to have it on record that it does indeed make people sick.

I am concerned about the long term effects it may have.

Please take my testimonial into consideration.

I live here in the grove in Pacific Grove near the corner of Pico and Evergreen, under many trees which seem to reactivate from the spray effect after rain or heavy fog. I have been having respiratory problems ever since the first spay and so has my old cat. The last time they sprayed I believe I am located in their turn area as the came back over use 3 times but not all at once. They sprayed, came back, sprayed then left and came back a third time. I do not believe the mentioned this area in their overspraying. It seems to be much worse now since it rained. I am taking the cat

to the vet today. I don't know what to do for him or me. This is so sad. I have lived here since 1990 and enjoyed the beautiful trees, plants and fresh air, now it seems everytime I spend time outside I have difficulty breathing. I used to have my windows open slightly so I could hear the ocean. I can't do that any more or I have to get up and use an inhaler to get back to sleep. I can't believe that our government allowed these people to spray innocent people and animals to satisfy the shipping needs of Mr. Kawamura and his associates and our governor signing this into an emergency law to allow them to do this to us until 2010. We all know it's all about being nice to the money not the people. I hope people remember who put them through this when they vote.

Sincerely

Valerie _____

"stephanie _____" <_____family46@yahoo.com>

To Whom it May Concern:

My name is Stephanie Morgan. I live off of Hwy 68 by Laguna Seca. Our area was sprayed back at the end of October. I have read that it was also over sprayed and I have yet to receive any kind of acknowledgement to that mistake.

I have filed a complaint with the Department of Food and Agriculture and I have heard nothing back from them. My son had severrunny nose, sneezing and cough for about a week and a half after the spray and my dog become completely flared up in a severe allergy attack and has cost us over \$500 to make well again. I would like to know what I can do to prevent this from happening again.

I have filled out the attached form from your website and hope to hear back from someone.

Thank You.

Stephanie _____

Mike Lynberg, Pacific Grove
December 19 2007

Following the second round of spraying of the Monterey Peninsula in October, I experienced significant chest pain – an ache deep in the left side of my chest. Stragely, my six-year-old son also complained of pain in the center of his chest on two different occasions within the first four days of the spraying. Neither of us had experienced those symptoms before, nor have we experienced them since.

**44 Complaints of illnesses following the aerial spraying of the Santa Cruz and Monterey areas
– Source: Citizen petition on www.stopthespray.org,
reported here for the first time on January 3, 2008**

Signer's Name: AnnMarie _____

Gender: 2, Age: 42

Location: Pacific Grove, CA 93950, US

Comments: In the days after the spraying I had a constant headache. Other people I know experienced upper respiratory symptoms consistent w bronchitis but with out acute symptoms like fever. I WILL NOT VOTE FOR ANYONE WHO EITHER BY SILENCE OR EXPLICIT AGREEMENT ALLOWED THE CITIZENS OF THE MONTEREY PENINSULA TO BE SPRAYED WITH AGENTS ABOUT WHICH THE SHORT OR LONG TERM AFFECTS ARE UNKNOWN. THE SPRAYING IS A BLATANT BOW TO AGRIBUSINESS AT THE EXPENSE OF CITIZENS!

Signer's Name: Giulietta _____

Gender: 2, Age: 50

Location: pacific grove, CA 93950, US

Comments: I experienced headaches and got sick with a respiratory illness shortly after the spraying (and I rarely get sick!). The spraying is unnecessary and an assault on our rights as citizens. Other agents have been considered "safe" and proven dangerous later. Prove to me this is safe before exposing us against our will.

Signer's Name: shannon _____

Gender: 2, Age: 37

Location: Pacific Grove, CA 93950, US

Comments: I felt very mis informed this past spraying. Information was given about the chemical make up that was later retracted, no one knew when they were being sprayed and really the TRUE precations they should take. I called the information line to become more informed, and during hours of operation thay did not answer the phone. When I did finally speak to a representative I was told differnt information than was on the newsletter. I have friends who have had difficulty sleeping since the spraying. I know for a fact I could not sleep the week during the spraying. I also had a sore throat and difficulty breathing for days after the spraying. I've heard many people complain of similar symptoms.

Signer's Name: Carri _____

Gender: 2, Age: 31

Location: Marina, CA 93933, US

Comments: I have personally seen and experienced the harmful effects of this spray on the human species. For the greater good? I think not.

Signer's Name: kalyani _____

Gender: 2, Age: 49

Location: carmel, CA 93923, US

Comments: Unexplained nausea not connected to anything else or other symptoms for one week after the spraying. Kalyani Gilliam LAc.

Signer's Name: Susan _____

Gender: 2, Age: 34

Location: Santa Cruz, CA 95065, US

Comments: I have a condition called Multiple Chemical Sensitivities and this spray will cause me to have to relocated out of Santa Cruz. I am a local Realtor, and active member of the community. This spray will make me very sick due to my delicate condition and could possibly even kill me. PLEASE DO NOT SPRAY FOR THE LIGHT BROWN APPLE MOTH OVER SANTA CRUZ COUNTY!!!!!!

Signer's Name: patricia _____

Gender: 2, Age: 56

Location: carmel valley, CA 93924, US

Comments: My family(myself included) had vague, flu-like symptoms after the last spraying.

Signer's Name: d _____

Gender: 0, Age: 41

Location: seaside, CA 93955, US

Comments: After the first spray my 16 month old daughter started an asthma like cough. I feel scared and helpless but we can't afford to leave town every time they spray. They won't even tell us what they are poisoning us with!! God help us

Signer's Name: Craig _____

Gender: 1, Age: 47

Location: Pacific Grove, CA 93950, US

Comments: My house was hit with the chemical 10/24. As a result, my lungs are irritated, and the house has an objectionable musty odor.

Signature #768

Signer's Name: Audrey _____

Gender: 2, Age: 47

Location: Seaside, CA 93955, US

Comments: I am writing to express my sincere concern over the spraying of Checkmate in

Monterey County, and to document the negative health symptoms I have experienced as a result.

I was at a beach party in Monterey on Friday, Oct. 26th, and planned to leave by 8 p.m. to avoid being out while the spraying occurred. The person hosting the party

said she heard that the spraying would be delayed that night, since there was an outdoor football game in the area, and they didn't want to expose the children present there to the spray. However, promptly at 8 p.m. the spraying began right over the beach we were on, and before I was able to get back to my car, at least 6 passes of the planes had occurred over my head. I was home by 8:30, and the sound of planes was audible for 4 more hours. They had been flying over my home for an hour the night before as well! I have since been experiencing a frequent need to clear my throat, sore throat, burning in my nostrils, headaches, and severe dizzy spells and "whiting out". I also feel many more muscle aches and pains than usual. I have resorted to applying a topical anti-inflammatory, Advil, and throat spray, since I cannot afford Doctor's bills at this time. I am a 47 year old woman with Multiple Chemical Sensitivities living in Seaside. I do not want to move out of the area, as this is where I have my home, job, and friends, but cannot accept this spraying without concern as to the public's safety! I did experience some of these symptoms after the first spraying, yet they are much more severe this time. I cannot risk repeated exposure. Please put a halt to this spraying immediately! I understand there are relatively harmless sticky traps, and I urge you to adopt these measures instead. Sincerely,
Audrey _____ Street Seaside, CA 93955

Signature #833

Signer's Name: Linda _____

Gender: 2, Age: 59

Location: Felton, CA 95018, US

Comments: Remember DDT, Malithon, Agent Orange, etc.????? Those were also considered "safe" but turned out to have devastating effects on the health of children and animals. I've already been experiencing severe migraines after walking on Seacliff Beach a couple of days ago, Immediately...nothing has helped and I'm exhausted and have a very raw throat and sinuses, blurry vision, and a vice grip around my head.

Signature #997

Signer's Name: john _____

Gender: 1, Age: 43

sLocation: pacific grove, CA 93950, US

Comments: It is not ok to spray chemicals on Californians. I have several patients who are reporting migaine headache and sinus problems they belive are linked to the spraying. I and many other health professionals believe that sythetic chemical exposure is behind much illness in our country. This needs to stopped.

Signature #1060

Signer's Name: Donna _____

Gender: 2, Age: 58

Location: Aptos, CA 95003, US

Comments: Last Tuesday/Wed the Apple Moth Spray was released in the air over my region. During the two days my breathing was affected and I had difficulty taking a deep breath and my throat was sore. The sympoms were MUCH different than a cold! These were just symptoms of what thed spray is doing to the physical body. I

am in good health. Imagine those with Asthma or Chemical Sensitivity. Doing this spraying needs to be banned and different less toxic methods used to protect "cash crops" of apples or any other market item. Thank-you. Donna _____

Signature #1307

Signer's Name: Jody _____

Gender: 2, Age: 51

Location: monterey, CA 93940, US

Comments: Came to Monterey from the bay area for my lungs. I have cancer and a history of asthma. Lungs were doing GREAT, UNTIL the spraying. anyone who I can call????

Signature #1377

Signer's Name: cynthia _____

Gender: 2, Age: 57

Location: Pacific Grove, CA 93950, US

Comments: I am in the spray zone and the effects are horrendous. I have burning eyes for weeks. It effects our sleeping as planes drone overhead for hours making 20 passes over our house. And businesses are affected. You have to be in your house with windows closed. This is a tourist area. I had scheduled a conference for over a year with people coming from all over the world and then we were faced with the prospect of people having to stay in their rooms with the windows closed.

Signature #1397

Signer's Name: Sabrina _____

Gender: 2, Age: 19

Location: Del Rey Oaks, CA 93940, US

Comments: There is signifigant proof within my own household that the spraying is harmful to our health. My sister developed a sore throat and breathing problems, my cat has stopped eating and drinking and I have a rash on my back that appeared after I rode my bike to school the morning after the spraying over my house. All three of these things occured directly after the praying occured. Could be a very large coincidence. What do you think?

Signature #1480

Signer's Name: Taale _____

Gender: 1, Age: 62

Location: Santa Cruz, CA 95061-0630, US

Comments: Brothers and Sisters, I am very sick with advanced Lyme Disease. For me, and possibly countless others, the spraying of Central California could be a death sentence. I am very worried about what really is in this spray, what they may add to the spray

Signature #1598

Signer's Name: Wende _____

Gender: 0, Age: 37

Location: Santa Cruz, CA 95060, US

Comments: We tasted the chemical sprayed last night in our mouths and became light-headed. This is absurd to put human health above the interests of global markets.

Signature #1606

Signer's Name: Richard _____

Gender: 1, Age: 60

Location: Santa Cruz, CA 95062-3248, US

Comments: Was kept awake the night of 11/8/2007 by the low flying spray planes and experienced burning eyes, throat, lungs, tingling lips and a chemical odor was perceived. Ended up with a headache as well. Don't know if I feel this headache, burning eyes and foul taste in my mouth was caused by the chemicals or just sleep deprivation. All I know is that these symptoms are not normal for me

Signature #1633

Signer's Name: debra _____

Gender: 0, Age: 55

Location: santa Cruz, CA 95060, US

Comments: After last nights aerial spraying in Santa Cruz, my eyes are burning and there is a metal taste in my mouth. This is an outrage! Where is the proof that there is a epidemic of sorts that require aerial spraying of an entire county! The spray is a toxic substance...our politicians should be ashamed of themselves...needless to say their agricultural contributors should be as well!! What can we do to stop this NOW!

Signature #1675

Signer's Name: shala _____

Gender: 2, Age: 35

Location: santa cruz, CA 95062, US

Comments: Please, please stop the spray. My eyes are watering and glands are swollen! I am concerned about my community!!!

Signature #1703

Signer's Name: michele _____

Gender: 0, Age: 37

Location: aptos, CA 95001-0896, US

Comments: I am adamantly opposed to the aerial spraying in SC county. I actually have had a headache and a strange taste in my mouth all day long since sitting on the soccer field during my son's game and the field was sprayed last night! I do NOT want my family to be human guinea pigs!!

Signature #1723

Signer's Name: Karen M _____

Gender: 2, Age: 42

Location: Soquel, CA 95073, US

Comments: After both sprayings I have felt nauseous, fatigued, and have had a headache which could not be remedied by Tylenol. Keep this stuff OUT OF OUR AIR!!!

Signature #1733

Signer's Name: Aaron _____

Gender: 1, Age: 37

Location: Santa Cruz, CA 95062, US

Comments: Please stop the spraying immediately. Both my wife and I got sick right after the first spraying. We do not want further exposure to the chemical being released into our air.

Signature #1711

Signer's Name: Dylan _____

Gender: 0, Age: 46

Location: Santa Cruz, CA 95060, US

Comments: After the spraying, my eyes are very, very dry, and I have an unpleasant metallic taste in my mouth.

Signature #1785

Signer's Name: Amber _____

Gender: 2, Age: 28

Location: Santa Cruz, CA 95060, US

Comments: Not cool, has effected my breathing, this is not fair not to have any say, human rights is a must!!

Signature #1796

Signer's Name: Terrie _____

Gender: 2, Age: 50

Location: Aptos, CA 95003, US

Comments: I have had shortness of breath, lost my voice, tiredness

Signature #1805

Signer's Name: Reija _____

Gender: 2, Age: 43

Location: Santa Cruz, CA 95062, US

Comments: Please stop the spraying. I believe that I am suffering physical and psychological damage by CDFA's & USDA's aerial spraying without my consent and without knowledge of the possible health implications to humans. I believe that this is an experimental procedure and we, the people of Santa Cruz, Monterey and other areas, are the guinea pigs.

Signature #1808

Signer's Name: kathy _____

Gender: 2, Age: 48

Location: santa cruz, CA 95060, US

Comments: I have been feeling ill ever since the spraying of my workplace and also my home November 8. Sore throat, very tired no energy, headache, runny nose and eyes, irritated eyes, sore lungs, coughing... PLEASE STOP THE SPRAYING!!!

Signature #1810

Signer's Name: Amy _____

Gender: 2, Age: 37

Location: Big Sur, CA 93920, US

Comments: I know people who have complained of feeling flu like symptoms after the spraying. I live in Big Sur outside of Monterey, and when I went into Monterey I felt like I was getting the flu and had to go back home. I started getting a head ache and went home to bed. The symptoms subsided after I was home in Big Sur for a few hours. I know that this is a very strong spray and needs to be tested more thoroughly before being sprayed on humans and animals.

Signature #1818

Signer's Name: jeffrey _____

Gender: 1, Age: 46

Location: santa cruz, CA 95061, US

Comments: Many menopausal women are experiencing sudden bleeding since the spraying in Santa Cruz. If you have had an irregular period or sudden bleeding following the aerial spraying in Santa Cruz or Monterey, please send email with contact info to _____@gmail.com My partner and aunt were both menopausal before the spraying, now there both started their periods again.

Signature #1822

Signer's Name: William _____

Gender: 1, Age: 29

Location: Santa Cruz, CA 95062, US

Comments: Many people that I have spoke with had experienced sore throat like symptoms. I for one do not condone the spaying having experience similar symptoms. My other complaint is that my organic vegetable garden can't be considered organic anymore because it's been sprayed. So much for trying to live a clean and healthy life.

Signature #1827

Signer's Name: Ellen _____

Gender: 2, Age: 0

Location: Santa Cruz, CA 95063, US

Comments: Having read some of the other comments that say exactly how I feel, I'm not sure what to add. I, too, feel violated due to the spraying, especially as I tried all in my power to stop it.

As a parent and educator, I feel this program of aerial spraying over our children is not only unconscionable, but also without any health and environmental review, it should be illegal as well.

I, too, understand that for the commercial interests of a few, all forms of life, us humans included, were subjected as "guinea pigs" to a poisoning program without our consent. When the planes flew over our home in Scotts Valley, they flew so low and sounded so terrifying I imagined that we were in a war zone. After two nights of spraying I suffered an intense headache all day and my daughter's eyes [message truncated]...

Signature #1831

Signer's Name: Susan _____

Gender: 0, Age: 0

Location: Santa Cruz, CA 95060, US

Comments: I was subjected to an aerial spray of the pesticide that is supposed to confuse the male moths with synthetic pheromones . I was nauseated, vomited and had stinging, itchy watery eyes and was coughing and wheezing the evening of the application and the following days.

Please stop all the spraying without consent of the population. I do not want to be a human guinea pig. Stop the madness it is only a moth not a deadly mosquito carrying a virus.

Signature #1850

Signer's Name: Catherine _____

Gender: 2, Age: 44

Location: Santa Cruz, CA 95065, US

Comments: Spraying triggered my asthma which has been in remission since Jan/Feb07. Also burning eyes,nose and throat. I have a young son with asthma and I am very worried about the effects to our health.

Signature #1873

Signer's Name: Cynthia _____

Gender: 0, Age: 55

Location: Pacific Grove, CA 93950, US

Comments: I am outraged that I am being sprayed without my wishes, with a chemical that has not been tested on humans. Please read the book, a biography on Rachel Carson, called, "The Gentle Subversive." The similarities to what is happening to us now are frightening. Chemical companies, big agriculture, and USDA, all claimed DDT was safe as well. As she argued then it is the same now, "the chemical industry and government scientists turned the public into unwitting guinea pigs as they conducted a war against insects." I believe as did Carson that every citizen has "the right to be secure in his own home against the intrusion of poisons applied by others" Furthermore, the spraying not only affects my health, disturbs my sleep and my mental state, it has caused me eye irritation, and has effected my personal life. I have had to come home early from a conference that I paid for so that I would not be out on the street when the planes were spraying, and had to cancel classes that I teach on spraying nights.

Signature #1884

Signer's Name: Katherine _____

Gender: 0, Age: 0

Location: Aptos, CA 95003, US

Comments: Please halt the spraying. The carrier chemicals for the moth pheromones may be toxic. I had a flare-up of chronic nerve pain within hours of the first spraying. It has remained.

Signature #1891

Signer's Name: Suzanne _____

Gender: 2, Age: 61

Location: Santa Cruz, CA 95063, US

Comments: The past spraying made me sick for about a week. Sore throat, uncontrolled sneezing, headache and congestion. There must be a safer way. I live in the Live Oak area of Santa Cruz, California

Signature #1892

Signer's Name: Amrita _____

Gender: 2, Age: 53

Location: Santa Cruz, CA 95063, US

Comments: I was out of town during a lot of the protest to the spraying. I returned two days before, and was not aware of the schedule. About four days later I got sick with diarrhea and vomiting and depression. Finally I realized that there was a connection in the timing. I am a very sensitive person, and may need to move away if this spraying continues. I am not the only one. I have learned in the last week that several of my friends have left Santa Cruz until this has been resolved. Aerial spraying is not good for anything except for filling the pockets of the AG industry. What about our physical health and the health of the communities in and around Santa Cruz?

Signature #1911

Signer's Name: Greg _____

Gender: 0, Age: 0

Location: Boulder Creek, CA 95006, US

Comments: My friend's son was adversely affected by this spraying too. How DARE they make a choice that could adversely affect so many lives without our consent.

Signature #1956

Signer's Name: Hebard _____

Gender: 1, Age: 70

Location: Monterey, CA 93940, US

Comments: The first pheromone spraying caused a hacking cough with no resolution which reduced in intensity 30 days later.

Signature #1987

Signer's Name: Marilyn _____

Gender: 2, Age: 52

Location: Santa Cruz, CA 95063, US

Comments: I have been having a respiratory itchy irritation that is unlike a cold, & suffering terribly for the last couple of weeks. My mom just had lung cancer surgery. She was getting better until the spraying began. Now she coughs & has irritation. Please Stop .

Signature #1999

Signer's Name: Randy _____

Gender: 1, Age: 52

Location: Soquel, CA 95073, US

Comments: As a medical doctor who practices in Soquel, I have seen several patients who became ill immediately after the first spraying. Some plan to move out of our area. I am very concerned about potential adverse effects on the many people who did not notice immediate symptoms, as the potential for long-term consequences has not been studied. There is also a strong potential for hazardous effects on marine life and other species. I see no justification for aerial spraying a large population with a complex mix of biologically-active chemicals which has not been adequately studied for toxicity. The potential minimal threat to agriculture does not justify putting so many people at risk. It is outrageous that the existing law to assess the safety of these chemicals has been circumvented. This is not only an important public health issue but a major civil rights issue.

Signature #2024

Signer's Name: Tammie _____

Gender: 0, Age: 0

Location: Aptos, CA 950032727, US

Comments: I have had bad head aches and a sore throat after the spraying every time I go outside

Signature #2047

Signer's Name: _____

Gender: 2, Age: 55

Location: Prunedale, CA 95076, US

Comments: On 11/9/07 our area was sprayed, then on 11/11/07 around 10:30pm I heard an airplane buzzing our property, this lasted until 11:30pm (one full hour). During this time period I had an outside fan on that would bring in the fresh air from outside to inside the house, I had this fan on while the airplane was buzzing over head. I called the local police to report the airplane because it was flying very low to the roof of our home for over an hour. The police told me that possibly they were spraying in our area. The following day my dad and I had runny noses and a cough that lasted for almost 2 weeks, we were very ill. We also noticed that all of our hummingbirds has disappeared. We normally have over 40 to 50 hummingbirds at our feeders during this time of year. After one week the hummingbirds came back. I also noticed strange behavior with earth worms and other small crawling bugs, they were leaving the soil and crawling into our home, then they would die. We found dead bugs and worms on our concrete walkways all around our home. It was very strange. I'm adding a picture of the hummingbirds, back at the feeders when they started to return.

Signature #2059

Signer's Name: Hannah Renee _____

Gender: 2, Age: 37

Location: Santa Cruz, CA 95062, US

Comments: I am outraged that we are being sprayed with pheromones that we don't know the impacts of on human health. Soon after spraying, I was sick for three weeks and while I don't know for sure if it is from the spraying, there is a correlation between the timing of the spraying and the timing of me being sick! STOP THE SPRAYING UNTIL PROVEN SAFE!!!

The following pages are 38 scanned illness report forms sent in by residents of Santa Cruz County following the November 2007 aerial spraying of that area with Checkmate LBAM-F, and by Monterey area citizens following the aerial spraying of that area in October 2007 with Checkmate LBAM-F, reported here for the first time on January 3, 2008

Nov 2007

6:30 PM Sat 11/10/07

My eyes started to burn while driving as soon as I drove into Santa Cruz last evening 11/9 around 5 pm. It was intense. Itchy eyes, burning eyes, lungs were irritated and reactive. Caused me to cough. Numb dull headache. The eye tissue swelled and was irritated under the lid and around the eyes. My eyes feel like there is a very strong solution of sodium in the air. My eyes, lids and throat were very irritated and glands slightly swelled. The burning eyes are not as bad indoors as I had sealed up my home before they sprayed.

I can still feel the effects right now as I am inside my home. My eyes are slightly burning. My whole sinuses burn.

Like when you get a whole lot of salt water up your nose.

Nothing I want to EVER experience again from the air I breath in Santa Cruz.

I am right at the buffer zone of 24th and Portola Ave S.C. and yet I can feel the effects. My eyes and sinuses are burning still and I have a headache.

Not as bad near the coast but as soon as I drive inland my eyes and throat get even worse.

Date & Time symptoms began : November 9/2007

Geographic Location where you first experienced symptoms

USCS upper campus

Symptoms and Duration of Each Symptom – (example “face turned red starting Thursday at 11:am”)

I am homeless and camping on UCSC's upper campus in a tent. They flew and dive-bombed a plane over 10 times. My throat feels raw and I ran a fever which caused me to soak the blankets with sweat. The next morning (November 10) I didn't feel that great but there is no fever, my throat is less raw and I have developed no other symptoms of flu or cold virus. I also felt psychologically terrorized as there was repeated runs and they flew very low. Each time the thought of them spraying stuff on me, especially without any protection a house affords you, made me miserable. Between the fear and noise of the very close plane I could not sleep till early morning. The thought that they will be doing it again is very upsetting. My life is already very hard with healthy things like rain falling from the sky but a tent keeps me mostly dry. But with the spray I have no protection in a tent. To be sure, the sweating was not the result of fear.

Any Previous General Health Problems (such as asthma, weak immune system)

No

Were you aware of spraying before symptoms began? No (Yes/No)

Did you Hear Planes Flying Overhead Yes (Yes/No)

Any other relevant information –

There are over 2500 homeless people in Santa Cruz and many live outdoors. Did they consider this when determining the "safety" of such chemicals, or is "safety" determined by assuming everyone in a spray zone lives in a house with rooves and walls and closable windows?

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

reaction to spray

November 14, 2007 4:26:48 PM PST

[REDACTED]@yahoo.com

Hello,

I am a 55 year old woman living in Santa Cruz County.

I did have a reaction to the spraying. My eyes were burning and I got a headache. I never have headaches or burning eyes.

Also, I felt like there was a metal type taste in my mouth. I experienced the taste in my mouth today as well when out of my home.

Another reaction happened to my 10 year old dog. She got sick to her stomach the next day after being in the yard. She very rarely gets sick to her stomach.

Needless to say, I am very upset with this whole spraying business. My husband and I feel that there was never a state of emergency. Also we feel that an environmental impact review should have been done before taking such a drastic measure as spraying all of our counties.

Please let me know if you have any other questions.

===== (v2)

Date & Time symptoms began

Thursday night, November 8th, 2007.

Geographic Location where you first experienced symptoms

At my home in "CDFA Zone 1, Santa Cruz." I live in a small single family residence.

Symptoms and Duration of Each Symptom – (example "face turned red starting Thursday at 11:am")

My zone was sprayed on Thursday, November 8th. I was mostly indoors during the spraying but stepped outside to let my dog out a couple of times that evening. I could smell and taste a very faint odor during the spraying. The next day, on November 9th, I had a bad sinus headache (with nausea, like a migraine). I took Excedrine Migraine and a Claritin-D but the symptoms continued, although slightly abated. Later that second night, I began to feel tightness and heaviness in my chest, and even some sporadic chest pains. My breathing felt labored so I used an inhaler that I use maybe once or twice a year during peak allergy season to try to improve my breathing. It only helped a little. I nearly went to the emergency room to make sure the chest pains weren't symptoms of a heart attack, but I didn't want to go alone in the middle of the night (3:30 am). It was a worrisome night -- I have not had a similar experience before. My breathing continued to be more labored than normal the next day November 10th. The following day (November 11th), after a night's rain, I awoke with a sore throat and renewed sinus congestion, and my chest symptoms had increased again compared to the previous day. Since then I've experienced a gradual reduction in symptoms but continue to feel tightness in my chest when I breathe and find it more difficult than normal to take deep breaths. I intend to follow up with my physician at a physical scheduled for later this month.

Any Previous General Health Problems (such as asthma, weak immune system)

I am a former analytical chemist and have developed some chemical sensitivities, including a latex allergy, as a result of repeated exposure to chemicals including latex gloves and tubing, strong acids, heavy metals, and certain organic solvents. I am also allergic to sulfonamides including the drugs Celebrex and Bextra. I am currently recovering from a back injury that required multiple major surgeries, the most recent of which was performed in May, 2006.

Were you aware of spraying before symptoms began? Yes (Yes/No)

Did you Hear Planes Flying Overhead? Yes (Yes/No)

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

Executed this 17 day, November 2007 at Santa Cruz, California.

Date & Time symptoms began 10/09/07 6:30AM AND 10/10/07 7:00AM

Geographic Location where you first experienced symptoms PRINGLE LANE SOQUEL CA

Symptoms and Duration of Each Symptom – (example “face turned red starting Thursday at 11:am”)

Sore Throat upon waking on both 10/09 and 10/10. Very bad on 10/10/07 it lasted all day. On
10/09/07 I was wheezing, rattling when I was breathing all day. 10/09/07 and 10/10/07 very bad headaches,
lasted until around 2:00 in afternoon.

Any Previous General Health Problems (such as asthma, weak immune system)

I AM VERY HEALTHY, NEVER GO TO THE DOCTOR

Were you aware of spraying before symptoms began? NO (Yes/No)

Did you Hear Planes Flying Overhead YES, IT KEPT ME AWAKE ALL NIGHT. YES (Yes/No)

Any other relevant information --

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

Executed this 11 day, NOVEMBER 2007 at SOQUEL, California.

===== (v2)

Date & Time symptoms began 11/9/07, Friday – 12:30 p.m.

Geographic Location where you first experienced symptoms UCSC campus

Symptoms and Duration of Each Symptom – (example “face turned red starting Thursday at 11:am”)

I went for a walk during my lunch break and had difficulty breathing – some pain in my chest, and my throat and eyes were burning. It lasted the rest of the day.

Today, 11/13/07, at UCSC (I am a bus driver) I again felt sore throat , burning eyes, shortness of breath, and stomach pain.

The symptoms seem to abate when I am back in Bonny Doon, which wasn't sprayed.

Any Previous General Health Problems (such as asthma, weak immune system)

none – I was previously in excellent health.

Were you aware of spraying before symptoms began? yes (Yes/No)

Did you Hear Planes Flying Overhead yes(Yes/No)

Any other relevant information --

I was in the Scotts Valley K-mart parking lot around 8:00 pm on 11/09/07 while the planes were spraying and wasn't able to get inside in time to avoid the spray.

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

Executed this 13th day, October 2007 at 9:00 p.m., California.

all resulting from spraying.

November 13, 2007

Aerial spraying has adversely affected my entire family and a lot of people I have encountered in the last few days.

I personally have experienced extreme anxiety, inability to concentrate, eye irritation, redness and watering, asthma, wheezing, nasal discharge, mental confusion, fatigue and a general weighed-down, heavy feeling. I feel like my ~~brain~~ brain is in a fog.

My children and grand-children who live, work and attend school in the sprayed area, have displayed symptoms of fatigue, irritability, headache, stomachache, wheezing, asthma, eye irritation, and difficulty focusing their attention.

To say there is insufficient evidence that the spray is not harmful to humans is ignorant.

2073

Furthermore I am outraged that anyone would consider aerial spraying of chemicals of any kind over homes schools and play yards where no ~~nothas~~ exist. It is irresponsible and ludicrous and must be stopped.

I do not live in the exact zones that were sprayed, but am adjacent to Aptos and not far from Pinedale. There are orchards in abundance in my area and we were sprayed previous to the advertised spraying. I work in the sprayed area and my son and I attend college there, so suffer the same exposure, though at varying times.

Please do everything in your power to see that nothing like this ever occurs again.

Many people are affected but do not know how or where to report symptoms.

I personally am uninsured and do not have a health care plan or provider. And really, there is nothing a physician can do to alter air

Living through this entire experience has been extremely stressful for all of us, adults and children alike. It has caused considerable anxiety among children and the elderly who like the rest of us, feel helpless and vulnerable.

Fresh clean unadulterated air is a basic human right.

Thank you for allowing the truth to be heard.

Respectfully submitted,

Gayle A. [REDACTED]

Were you aware of spraying before symptoms began? Yes (Yes/No) Left area 11/6-11/10

Did you Hear Planes Flying Overhead Yes (Yes/No) Left area

Any other relevant information -- We left the area Tues. & stayed gone
until spraying was completed of our area & of
County.

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

Executed this 19th day, November 2007 at Santa Cruz, California.

Signed Dukh Niweran Khalsa

Report of Dukh [REDACTED]

Date: Monday, November 19, 2007

They sprayed Live Oak where we live on Thursday nite, November 8th or early on the am of the 9th. They sprayed the rest of Santa Cruz on Fri. nite, November 9th and early am on the 10th. We went to a motel while they sprayed and came back at 3:30 pm on the 10th.

Here's what's happened when I returned to my home in Live Oak and when I'm in the areas surrounding it that have been sprayed such as Santa Cruz, Soquel, and Aptos:

1. Headache any time outside without a charcoal allergy mask or inside without air filters and/or a mask. This lasted for seven days , all day/all nite from November 10th-November 16, 2007. I STILL HAVE PRESSURE AT MY TEMPLES ALL THE TIME.
2. Involuntary continuous head jerking anytime outside without a mask. This lasted seven days. From November 10th-November 16th, 2007.
3. Muscle aches when touched surface outside, ie. my hand ached for 30 min. after touching newspaper wrapped in a plastic bag Sun. AM., November 11th, 2007 after it had rained.
4. Muscle aches when got home on Saturday, November 10th--shoulder, thigh, back. Aches that weren't there until got home and in places that don't normally hurt. Lasted 30 min. to a few hours.
5. Couldn't be inside places without a filter, ie. restaurant, exercise class, doctor, unless eating, chewing gum, or a mask. This went on for seven days.

Executed this 19th day, November 2007, at Santa Cruz, California.

Signed

Date & Time symptoms began 9/25/07

Geographic Location where you first experienced symptoms Pacific Grove Recreation Trail the afternoon of 9/25/07

Symptoms and Duration of Each Symptom – (example “face turned red starting Thursday at 11:am”)

This report is about my dog, PJ, a totally healthy, active Australian Shepherd who suddenly experienced breathing problems while walking on the PG Recreation Trail, on 9/25 after the first spraying.

I immediately took him to the Ocean View Veterinary Hospital. He had blood and fluid in his lungs. An examination by a cardio-specialist found his heart to be sound, however the pulmonary artery was engorged. He underwent blood pressure treatment and there was no real improvement and eventually got worse. On October 21st Ocean View sent PJ the cardiospeciality practice at Pacific Veterinary Hospital in Capitola. He had pneumonia and his heart rate was 200. Despite the speciality care, he had to be put to sleep on October 23 with no cause known.

Any Previous General Health Problems (such as asthma, weak immune system) None

Were you aware of spraying before symptoms began? Yes

Did you Hear Planes Flying Overhead? Yes, we all stayed inside.

Any other relevant information -- About an hour after the first aerial spraying over our home, I left PJ briefly out of the house to relieve himself as he always needed to. I remember the air smelled like a new plastic shower curtain and wondering about what was really in the spray and why there wasn't an environmental report before it was sprayed over a populous area.

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

Nov.

The following several pages are a detailed summary of 37 complaints of illnesses by Santa Cruz area citizens who signed a petition at a homeless shelter or in two downtown locations. Their illnesses followed the aerial spraying of the Santa Cruz area with Checkmate LBAM-F in November 2007. These complaints are reported here for the first time on January 3, 2008

Petition And Findings Concerning Possible Health Effects Of Checkmate Spraying in Santa Cruz, CA on Nov 8 and Nov 9, 2007

By John Thielking, BA Physics

12-16-07

On November 11, 2007 from 12PM-4:30PM I had a table set up in front of Bookshop Santa Cruz with a sign on two sides that said “Were You Affected By The LBAM Spraying? Let's Talk!” I talked to a total of 11 people who said that they or someone they knew had experienced symptoms from the spray. I handed out the health reporting forms and made a tally of how many people I had talked to. No other information was recorded at this time. The only publicity of this event was a single announcement on Free Radio Santa Cruz about 2 hours before I showed up at Bookshop Santa Cruz. Because I consider this to be a nearly random sampling of the general population, I initially estimated that 1%-2% of the general population could have been affected by the spray. This was because I estimated that approximately 500 people had walked by my table in the course of the 4.5 hours that I was there. The next weekend, Nov 18, 2007, I did a more accurate count of people walking by the table and estimated that more like 3000 people had gone by the table on Nov 11, 2007. In that case, 0.37% of the population could have been affected by the spraying and would have reported this to me if I had sampled the entire 100,000 population of the Santa Cruz area that was sprayed by having them walk past my table. Put another way, if I had seen all of those people, I would have counted a total of approximately 350 people.

On Nov 18th, 2007, I had a table in front of Bookshop Santa Cruz from 2:30PM-4:30PM where I circulated the following petition. I announced that I would be there just once on Free Radio Santa Cruz at about 11AM the same day. I read the entire petition on the air when I announced it.

Petition to Stop the Checkmate Spray and to Protect The Homeless

Whereas data, including but not limited to a tally of 11 anecdotal reports taken from a group of approximately 500 people in Santa Cruz, CA on November 12 [sic], 2007, indicate that the Checkmate spray applied in Santa Cruz, CA on November 8 and November 9, 2007 was severely irritating and/or immediately dangerous to the health of up to 1%-2% of the Santa Cruz area population who were living indoors; and

Whereas people who are outdoors during the Checkmate spraying, including the vast majority of homeless people in the Santa Cruz area, are likely to be exposed to higher doses of the components of the spray that are severely irritating and/or immediately dangerous to their health than are people who are indoors during the spraying, therefore

We, the undersigned residents of Santa Cruz County, and other concerned citizens, respectfully request that, in addition to continuing to exercise all legal means available to stop any further Checkmate spraying over populated areas in the first place, the City and County of Santa Cruz provide fully enclosed shelter for homeless people during any further Checkmate spraying events.

We call on the Santa Cruz City Council and the Santa Cruz County Board of Supervisors to address and vote on the issue of providing shelter to homeless people affected by the Checkmate spray before the December 2007 winter break, so that adequate plans for shelter for homeless people affected by the spraying can be in place before the Checkmate spraying that may resume in February 2008.

		No	Yes	Mild	Medium	Severe	
Percy [REDACTED] M (unintelligible)	[REDACTED]			x			Sick
Sandy (unintelligible) (unintelligible)	4 [REDACTED]	x					

Conclusion about the Nov 18, 2007 petition: If this is in any way a random sample of the general population it raises serious questions. The minimum number of people affected by the spray is consistent with the previous informal survey on Nov 11th (4 people out of ~1500 who walked by the table reported they may have been affected by the spray). This backs up the estimate of a minimum of 350 people in the Santa Cruz area being affected by the spray, based on the survey conducted on Nov 11. A more disturbing possibility is that the entire petition on Nov 18th (23 people signing the petition who were either affected or not affected by checkmate) is representative (even approximately) of the general population. This means that the **most** number of people likely to have been affected by the Checkmate spray is 17% (4/23). There may be biasing either way due to the leading nature of the petition statement on the first page and the absence of the same statement on the subsequent pages, since most of the “affected by Checkmate” positive responses are on the first page where the entire petition is visible. Most people who signed the 2nd and 3rd pages did not stop to read the complete statement on the first page.

At the San Jose Courthouse and subsequent petition signature gathering, the following petition statement was always on the first page followed by the headline statement (as in Page 2 and Page 3 above) on subsequent pages. Note that the information sections have been modified slightly to be more flexible and to gather more information and the estimate of the number of people walking by the table on Nov 11, 2007 has been updated.

1st page, San Jose Courthouse 11/20/07 at the gathering of folks after the lawsuit to stop the spraying was dismissed:

Petition to Stop the Checkmate Spray and to Protect The Homeless

Whereas new information, including but not limited to a tally of 11 anecdotal reports taken from a group of approximately 3000 people in Santa Cruz, CA on November 11, 2007, indicate that the Checkmate spray applied in Santa Cruz, CA on November 8 and November 9, 2007 may be severely irritating and/or immediately dangerous to the health of significant numbers of the Santa Cruz area population who were living indoors; and

Whereas people who are outdoors during the Checkmate spraying, including the vast majority of homeless people in the Santa Cruz area, are likely to be exposed to higher doses of the components of the spray that may be even more irritating and/or immediately dangerous to their health than are people who are indoors during the spraying, therefore

We, the undersigned residents of Santa Cruz County, and other concerned citizens, respectfully request that, in addition to continuing to exercise all legal means available to stop any further Checkmate spraying over populated areas in the first place, the City and County of Santa Cruz provide fully enclosed shelter for homeless people during any further Checkmate spraying events.

We call on the Santa Cruz City Council and the Santa Cruz County Board of Supervisors to address and vote on the issue of providing shelter to homeless people affected by the spray before the December 2007 winter break, so that adequate plans for shelter for homeless people affected by the spraying can be in place before the Checkmate spraying that may resume in February 2008.

Conclusion about petition at San Jose Courthouse and Pacific Garden Mall: These two petition gathering events are examples of the responses expected from groups of people organizing to stop the LBAM spraying. Note that in these two instances the rate of reporting of symptoms is higher than in the Bookshop Santa Cruz petition, because the population signing the petition is a select group likely to be already complaining of symptoms and is not representative of the general population. In these two examples, the vast majority of people signing the petition reported experiencing physical symptoms that might be due to the spraying. In the case of the Courthouse petition, probably only 25% or less of the people present were even aware of the petition, since I was the only one circulating it there. In that case, it is reasonable to estimate that while only 23 people reported physical symptoms on the San Jose Courthouse petition, probably there were in fact 100 or so people present at the event that had actually experienced physical symptoms. This percentage estimate is borne out by looking at the number of hands raised at the Dec 9 meeting at Santa Cruz City Hall where the majority of the people present answered in the affirmative when the question was asked if they had been affected by the spraying.

Petition circulated at the Human Rights Organization event showing a movie about homeless people followed by an attorney meeting with various homeless people to talk about making them part of the lawsuit to end the sleeping ban:

Based on the 17 people who signed the petition at the St Francis Kitchen, it seems that homeless people are more affected by Checkmate than the general population who live indoors. Seven out of 17 people signing the petition at the St Francis Kitchen reported they had been or may have been affected by the spraying. An additional person who checked “severe” was excluded from this total since she indicated a bacterial infection that may have been pre-existing. This sample of 17 people is probably a representative sample of the homeless population since no advance notification was given to anyone that I would be circulating the petition there and homeless people generally gather there for the main purpose of having lunch. Fewer people than normal were there on 12-4-07 since most people who use the kitchen do so at the end of the month when their money runs out and they can't afford to eat at a fast food place instead. Comparing the results of the 12-4-07 St Francis petition to the results of the 11-18-07 petition at Bookshop Santa Cruz, it seems more likely than before that the 4 out of 23 people reporting possibly being affected by the spraying in the Bookshop Santa Cruz petition could be representative of the general population. These conclusions underscore both the need to protect the homeless from the spraying activity and to stop the future spraying from happening in the first place.

Overall conclusion: This collection of petition signatures gathered produces all of the expected features in the data trends that would be expected if the Checkmate spraying were having a real negative effect on people's health. The general population that is living indoors appears to be less affected by the Checkmate spray than people who are forced to live outdoors. The highest reported incidences of negative effects due to the spray occur when polling the people who are organizing to protest against the spraying. Finally, the total number of people who showed up at the Courthouse in San Jose on Nov 20 plus the people who showed up at the Dec 9 meeting at the Santa Cruz City Council Chambers is not inconsistent with the 350 people predicted based on the initial 11 people that I talked to on November 11 in front of Bookshop Santa Cruz. Because only about 3% of the general population is politically active in general anyway, plus the **raw percentages** of people possibly affected by the spraying indicated by the Nov 18 and Dec 4 petitions, it seems likely that the numbers of people who have so far reported symptoms from the spraying, or who are currently organizing, are just the tip of the iceberg. To determine what is really going on will require a detailed survey of a larger segment of the general population.

We believe we've been affected.

Beginning on Tuesday 11 Sep, our 11month old son developed what we thought was a simple cold. It progressively became worse to the point where he had very labored breathing, severe congestion, and loss of appetite. He also seemed to act very groggy/delirious. We brought him to the Monterey County emergency room on Friday, and he was admitted for the weekend for albutirol respiration therapy and steroid cocktail drinks. He tested negative for RSV, and has subsequently been diagnosed with Reactive Airway Disease (RAD).

Our boy has always been very healthy.

His breathing is now normal, and we expect to have him discharged on Monday.

Mike,

Sorry I've been quiet lately. My son unfortunately had a bad relapse a couple days ago and is back in the hospital...this time they transferred him to a Stanford-affiliated hospital San Jose. I thought this meant that it wasn't the spraying that caused this...however the pediatric specialist said it still very well likely could've triggered his first reaction...just no way to know for sure. Looks like my son is especially sensitive now to environmental triggers, and most likely will have asthma for hopefully the short term.

What angers me is the thought that his bad reaction to the first round could've damaged his lung development to the point now that he will often have asthmatic reactions to other stressors.

Did you receive Dr. Philp's conclusion/recommendation from Ellen? I'll forward it to you just in case...not sure who else can use it.

Please keep up the good fight. I'll help when I can. God bless you.

Tim

I am totally against spraying what is believed to be safe. My mother has COPD and landed in the hospital this past weekend with a severe case of NOT BREATHING! She could have died.

She was admitted Sat. Sept. 15th, Community Hospital of Monterey Peninsula under Elisabeth _____.

My whole family has allergies and are sensitive to pesticides! That is why we live on the peninsula in hopes to have clean wholesome air. The air is fowl and my whole family are ill.

I have also been feeling very ill with a bad sore throat, stuffy nose, rash on throat and chest air impairments and feeling ill like having the flu. My brother out of no where developed the same symptoms. I am hearing conversations all around that everyone is have the same symptoms.

SUGGESTION: If the state would ask all the communities on the peninsula if we would volunteer to assist in the old fashion way with the twists, we would have plenty coming forth to assist.

I urge the spraying to stop. I am very concerned for my family and especially my mother. She is trapped inside her apt.

Subject: September 10,2007 First Night of Spraying at Fritsche Field

Mike,

My husband, Robert _____, had a severe reaction to the spraying as the chemicals drifted into our home via the fire chimney which was not in use on September 10, 2007. This seriously impacted his respiratory system.

Our home is directly adjacent, west of the airfield so that first night, the spray drifted into our neighborhood.

I rushed him to CHOMP's emergency room at midnight. Consequently, spent hours there until he was stabilized to return home in the early dawn.

One thing shocked me was that the hospital's news release on 9/11/07 advised that there were no illnesses reported or admitted to the hospital. Evidently, the emergency room activity(ies) were not checked before the public news release.

Unfortunately, even heeding the "suggestion" to stay indoors as much as possible does not curtail the allergic or severe respiratory reactions experienced by so many human beings.

We are supportive of the brown apple moth controls however, there must be a better alternative than continual spraying a chemical that causes adverse reactions on human beings and animals.

We will write to our State of California representatives as well.

Sincerely,

Joan _____

SUMMER _____ <_____@sbcglobal.net> wrote:

I have been more lethargic the past two days but assumed it was from tending to a cranky-sick 2yr old. I wonder if it had anything to do with the spray?
My daughter is 2 yrs old and weighs 29lbs. She is generally very healthy but has been sick since the morning after our zone (#5) was sprayed. She woke up Tuesday morning and was fine. We went for a walk that morning instead of going to any parks in the area to avoid contact with the spray. That afternoon, after her nap, she woke up crying and very cranky. She complained of stomachaches, her head hurting and a stuffy nose. Wednesday night she woke up and 1:30am and was up until 5am crying and complaining of not feeling well. Mind you she sleeps through the night normally from 9pm to 7am. I am concerned of the timing in her illness being that it happens to coincide with the three nights that our zone was sprayed. We were told that our zone would be sprayed one night and i am very upset that we were sprayed for three and that the third night took place with little warning and after everyone had been told this was finished.

Thank you,

kristy _____ <_____@sbcglobal.net> wrote:

My husband helped put tarps over the play equipment at Teddy Bear Preschool after the same tarps had already been used on the first two nights of spraying. That night he was having trouble breathing. The next day he had a very intense chest cold and had to stay home from work. Now that the spraying is over, his chest has cleared up. He did have asthma as a child and is likely more susceptible to this type of irritation, however, since I have known him for 15 years, he has not ever had this happen. Additionally, my daughter was rolling on the grass at her friends house the day after it had been sprayed and became incredibly irritable within about 15 minutes, and her eyes were red, until I put her in the bath. She is still complaining of a sore throat.

"Casey" _____ <_____@sbcglobal.net>

I am writing in response to the article in today's Herald.
I must admit that I did my thorough research prior to last week's spraying and determined that it would be OK to stay in town with our 4 1/2 month old son.

He has developed a 'different' rash on his face, back, butt, and legs for the last 5 days. My wife and I have been trying to figure it out and never considered the spraying to be a potential source. He has a rash and I am now thinking it may be a result of the pheromone spraying. He also has green diarrhea and has had so for the same 5 day period. He is strictly breastfeeding and my wife has had no change in diet. Any other cases of this yet?

This may be a coincidence and may not.

Concerned,

Casey _____

We do not live in the spray area, but in Spreckels - which is just downwind from the outer edges of the spray area in Marina. We were also in Pacific Grove on Thursday. Now, it may all be coincidence, but if you are keeping tabs I just thought I would let you know that all weekend and into this week I have had headaches, sore throat, stuffy nose and have been very tired. It could just be a cold or allergies. But what is interesting is that I run a home daycare and usually around this time of year all of the kids are sick and I get my first cold. But, the kids all seem fine. In fact, I cannot remember being around anyone that is sick. So, where it came from I don't know - could have been the handle of the grocery cart or a doorknob or any number of places. But, I just thought I would mention it since the timing coincided with the spraying.

Subject: Reactions to moth spray

Hello, a friend at work forwarded this email to me because all week long I have been complaining about the symptoms I've experienced since Monday morning. Glad to know im not alone!

- Itchy eyes, ears, nose and throat
- Shortness of breath
- Losing my voice (not totally gone but scratchy here and there, and more hoarse then normal)
- Sinus headaches
- Dizziness
- Blurred vision at times
- Dry mouth
- Deep cough in the chest

Basically, I feel like I am sick but I'm not sick! I was outside though Sunday night and Monday night, and I sleep with my windows open. I didn't know anything about staying in doors and all that until someone told me Tuesday. Hope this information proves to be useful!

Subject: FYI: Sore throat diagnosis

I live at _____ Ave, Monterey (across from Del Monte School). My house was sprayed Tuesday night 9/11. When the planes flew over my house Wednesday night I went out to my backyard and realized my neighbor John Freeman was in his backyard. As we spoke to each other a plane flew directly overhead and sprayed us. We saw the spray come out of the nozzles.

The next morning my neighbor John reported to me that he had a itchy throat, I told him that I also had one. My throat continued to be sore and I developed a typical "sore throat" cough. This condition persisted, so on Sunday 9/16, I went to Doctor's on Duty where the attending physician noted "patient has pharyngeal irritation and otitis external. -J. Sedgewick MD" (I have a copy of this documentation)

One of Dr. Sedgewick's specialties is Public Health, she told me that the aerial spraying 4 and 5 nights ago could easily have been the irritant that caused my throat to be red and itchy.

To whom it may concern

I am glad to hear that my fiance and I are not alone in feeling the effects of the LBAM spraying in this area. Since the start of the spraying we have been both suffering from itchy eyes, nose and throat with excessive bouts of sneezing and muscle aches. These symptoms are NOT, i repeat NOT something either of us deal with on a daily basis as we are healthy individuals who lead a simple vegetarian lifestyle.

What gets me is that even tho the spraying took place in the Marina - Pacific Grove area and you would think that most people who are feeling these effects would be in that area we live in South Salinas and were right over the flight path of the planes (we know this because we heard them flying pretty low over our house nearly every 20-30 minutes from 9pm till nearly 5am).

Thank you for taking the time to read this as I am sure you are inundated with emails from others with similar symptoms. I look forward to speaking to you if you need any further assistance in this matter.

We stayed overnight out off the peninsula each night the area was to be sprayed.

Within a few hours after we returned the morning after block 5 was actually sprayed I experienced two problems:

1. My Blepharitis (eyelids began itching and discharging) flared up. I am able to control this condition by scrubbing the edges of the lids several times a day (prescribed by my ophthalmologist). But it is uncomfortable and if I am not careful degenerates into Conjunctivitis which has to be treated with antibiotics.

Normally the Blepharitis only appears when the pine trees bloom and or the acacia tree near our home blooms -- its is not that time of the year. The spraying left something in the air that acted to plug the ducts around the eyelashes thus producing the Blepharitis.

2. The Psoriasis on my face flared up (began itching and became inflamed). Again I have been able to control it by the application of medicine previously prescribed by my dermatologist. However, such episodes are very uncomfortable.

Both of these issues are continuing but slowly resolving.

Bob

_____@sbcglobal.net

My boyfriend and I both felt very fatigued and had muscle ache/fatigue and headache on Monday and Tues -- started feeling a bit better yesterday and better today. I noticed that my little dog was a bit restless those days, too -- like he didn't feel like himself. I could also smell and taste the chemical in the air -- as could most of my patients in this area

Emily _____ <_____@comcast.net> wrote:
Hi Mike -

Here's our account of falling ill shortly after spraying, and may I
say that none of us - child, husband, myself - get ill easily. Also,
my 4 year old son is not in daycare, preschool or any sort of group
child activity where he might commonly pick up germs. He is at home
with me full time in PG.

We're in PG, spraying block 4 near Safeway, and were sprayed Monday
night, Sept 10. The planes were flying over our house again on both
Tuesday and Wednesday nights, but the CDFA Hotline personnel said
that they were on route to other locations and not spraying us again.

My son is now very sick (very sore throat, stomach upset, droopy,
feverish, not sleeping well) and my husband and I both have various
symptoms (coughing, light-headedness, sore throat, tightness in

chest, general malaise).

I did not let my son play in our yard for 3 days after the spraying, and we didn't even go out of the house Tuesday or Wednesday until afternoon, when we went straight to our car and drove away. Our only contact with the "outdoor" world most of the week was in stores. On Friday, 3 days after we were sprayed, I let my son play in our yard a little, under the oak tree in the deep leaves: no way to wash all the oak leaves off. Friday evening my son complained of "ouchy ears" while spending time outside, not something he has ever had before, ever. Friday night my husband had a protracted coughing fit (unusual - he was not sick, does not cough regularly, does not smoke, etc..)

On Saturday, my son and husband spent the afternoon outside in the yard and on the rec trail, and then I joined them. Saturday evening my husband developed shooting pains in his stomach and had a sore stomach for all of Saturday night and through Sunday. Also on Saturday evening I developed a sore throat and painful ears after being outside for awhile. Saturday night, my son became irritable and whiny, and complained of stomach acid in his throat.

Sunday morning my son woke with a severe sore throat and diarrhea and a fever of about 98.5. I also had a sore throat throughout the day. Sunday night my son was distinctly droopy and feverish, and had a very hot and uncomfortable night.

Monday we took him to the doctor where he was diagnosed with Strep Throat, which could be a "secondary infection" or complication of weakened immune system, ie a reaction to something else. My son has never had Strep Throat before - very rarely gets any sort of illness at all, and if he does it rarely lasts more than a day or two. This illness is highly unusual and unprecedented and I am deeply suspicious about it's timing and origin.

Thanks for compiling these accounts. I'll try to make it to the Monterey Council meeting today, if my son is feeling well enough by then.

Subject: Re: Have you had an adverse reaction to aerial spraying?

Well first off I would say I have major sleep deprivation! The anxiety that this spraying/not spraying/did they spray or didn't they/what half was sprayed.....I have not slept in days/nights. Last night was the absolute worst. I felt like we were being bombed! Elijah was the only one who seemed to have slept.

Everyone else in my house was up literally the entire night.....Elijah woke up this morning saying "I just feel tired!!!!!!!!!" So I guess none of us slept!

I have had some interesting respiratory/allergy attacks. Sore throat, tight chest, congested, headaches. I have heard children complaining of similiar symptoms. Esme' Johnson went home early on Tue. w/ congestion, sore throat. Rachel Coniglio (2nd) grade complained of a sore throat today in class. Are these just typical rhino virus symptoms or are these side effects of the spraying? Who's to tell?

liz _____ <_____@***yahoo.com***> wrote:

I have not felt well ever since the spraying started. Specifically, I have had nasal and throat irritation, dizziness and labored breathing.

I took my two young sons away from the peninsula for the day so they could breath freely and play outdoors without worry. Upon returning home in the evening, I could notice a difference in how I feel - this is NO COINCIDENCE!

kristy _____ <_____@_____.***com***> wrote:

I have already sent in a reaction from 2 members of my family, but now have new reactions to report.

First, I have had a sore throat since September 13, but I chose not to report it as I assumed I was coming down with a cold. However, almost a week later, my throat still hurts, and I am not sick. I have no other symptoms.

Second, I was doing yard work with my 3 year old daughter yesterday for about 2 hours until she started complaining of a stomach ache. This is from a child who NEVER complains. So, we came inside, washed our hands, closed the doors and changed activities. Within a few minutes she volunteered that her stomach felt much better.

Third, my son has been complaining of headaches that have come and gone over the past 4-5 days. Again, he has no other symptoms.

I know that the Department of Health is waiting to hear from health officials for reported cases of related illness. I find this quite offensive as I can't imagine calling our pediatrician to ask about a symptom that was better moments later, when we (as the label states) got fresh air. I can't imagine taking her or my son to the ER for symptoms such as what I describe above, it would not only be inappropriate, but too expensive!

I am a senior living in Marina in a senior community where I am the Relief Manager and the Activity Director. I am in good health, no ailments, and take no prescription drugs. I walk my dog each morning at 9:30 and again in the afternoon.

After the spraying, I experienced the following symptoms which lasted through the following Friday: : disoriented, listless, a longing to sleep (all day?) and, surprisingly, becoming somewhat snappish, almost temperamental.

I did not see a doctor because the symptoms were vague--put simply: a feeling of unwellness and I do not care to become involved with specialists, tests, prescriptions and appointments.

Instead I chose to see if the symptoms reappear after another spraying at which time I would contact the CDFA, the Health Department, the Mayor of Marina, the Monterey Herald, the Governor and any all others.

Did I read that this is a "time-released formula" and, if so, for what length of time is it effective and is it still laying around being "effective"?

My wife and I had flu-like symptoms that started around the time of the spraying. We didn't know whether to attribute it to the bombing, or whether we would have caught this infection anyway, or whether it was all in our heads.

Even if there were no immediate symptoms, I would be skeptical of the alleged harmlessness of the spraying. Also, I consider the whole thing to be an invasion of my privacy and a trespassing on my property. Aside from regular air-travel routes and the occasional police search for criminals, why should anybody have the "right" to fly over my house and yard?

_____@aol.com wrote:

I read the article in Wednesdays Herald and am so glad someone is trying to do something about this.

I was very upset about the spraying because for one thing, I was babysitting my 4 month old grandson during that period of time and would not have wanted him here had I known.

I closed him into an inner room and put blankets at the windows - but the next morning I awoke with what I called stomach flu - nausea, vomiting etc. It lasted for 3 days. I did not go to the doctor.

We read in the paper that they would not be spraying over our area of Pebble Beach (near the lodge) and yet planes flew over and all around our house for hours one night.

I am so opposed to government agencies being allowed to rain down their "safe" chemicals on us without our permission. As we all know the agencies that decide what is and is not safe are very often very mistaken.

Please let me know if there is anything I can do to help fight this or another group I should get in touch with.

Thank you for trying to help in this extremely important matter.

Dear Concerned Citizens Against Aerial Spraying,
First - thank you so much for your dedication to this terrible breach of our rights. I would be very willing to help in any way I can. Please feel free to contact me at the number I will post below.

I haven't gone to my doctor to ascertain whether or not these symptoms are related to the spraying. My understanding is that it would be impossible.

I was not prepared nor did I anticipate the noise intrusion during the spraying. I was unable to sleep for 4 of the 5 nights due to the low flying planes. This sleeplessness has continued. Last night (Tuesday, Sept. 18) was the first night I slept 5 hours consecutively. The symptoms I've been feeling are related to this extreme fatigue: muscle pain, dizziness and irritable. Has anyone else experienced this? Could it be related to the spraying? Can it have a neurological affect on animals? Both my husband and I have had periods of dizziness that are quite unusual for us.

I will contact the website to Stop Overhead Spraying to volunteer my time.

Thank you for all your help.

Sincerely,
Jennifer _____

"Samualla _____" <_____@sbcglobal.net>

Sir/ Madam;

Since the arial spraying of Seaside, I have had headaches, and a sore throat. I doe have chronic respiratory probelms that have gotten worse. I was unable to prepare for the spraying as at the last miniute they changed the designated area. My 4 1/2 old son has had sinus trouble, and has chronic health issues. My 20 month old has had significant sinus drainage but no underlying health issues. My dogs have been sprayed. I have two 3 1/2 year old Aussies with NO health issues. After the spraying my male Aussie who is chewing his hair off and his skin bothering him. I took both dogs to the groomer after the spraying, but it still seems to be bothering the male more than the female.

Also, my father who is 70, complained of headaches, and a sore throat after the spraying and almost having a cold. He has a history of heart surgery. He also lives in Seaside and was unaware of the spraying until the planes flew over.

I am against this arial spraying! What are the long term affects? THEY DO NOT KNOW! This is wrong! The state does not have the right to endanger the health of my children, my father, and myself.

I was ill 2 partial days from the spraying. Head and neck pain, fuzziness, blurred vision and extreme nausea. I did not go to the doctor nor was there time to do so but did report this to my employer and had to cease all activities for a few hours directly due to it. I felt sick on Wednesday after the spraying and then began to feel better at night due to staying inside, actually, stayed inside all that week at night due to the spraying. What I thought was really strange was that I was feeling better Thursday morning and then took a walk during lunchtime, 1pm - 1:30pm and became very ill within about 15 minutes. Upon returning to work I could not function at all that whole afternoon. My stomach churned a lot, my head/neck hurt a lot and I felt a little dizzy and not well-focused. My computer screen seemed to "bounce" around, which worsened my stomach condition. This was absolutely connected with the spraying and I am not happy at all. Please let me know if there are any groups I can join for any law suits brought against this unforgivable action. I am very concerned about long-term effects as well.

thank you very much. Ron in Monterey

Brighty _____ <_____@yahoo.com> wrote:

Hi my name is Brighty Campbell I live in Salinas. After this spray has occurred there have been 4 sickness in my family. 4 out of 6 people have been sick. My boyfriend has had very bad headaches, as well as my mom and 16 year old sister. all four of us had had coughing, sneezing out of control, a lot of built up mucus and loss of taste, as well as poor hearing. I napped before work on monday Sept. 17 and woke up with a severe nose bleed. I have not had a nose bleed in over ten years and have been hit playing sports several times in the nose. A nose bleed is very very uncommon for me to get. Me and my mother both have Asthma. Today my mom woke up weezing uncontrollably, her inhaler which she has used all her life, all of a sudden stopped having

the effect it always has, which is to stop her weezing. My family rarely gets sick, so we think that it is a big coincidence that all these symptoms match up to other's which we read about in the monterey Herald.

Elisabeth <_____@yahoo.com> wrote:

Hello,

I was happy to see in the Herald today that someone is helping to keep track of what the local residents have experienced as a result of the "non-toxic" spraying of pheromones that recently took place. I've yet to hear an answer as to why the "non-toxic pheromones" smelled exactly like pesticide.

My Emotional Reaction

The whole experience was dangerous - planes flying too low over people's homes like dive bombers scattering a substance never tested before in a populated urban area . . . what the heck are we thinking?!! Hopefully we haven't killed off too many people while while creating gender confusion for moths.

My Physical Reaction

I've been experiencing a burning sensation in my nasal passages as though I have a sinus infection. This is causing headaches and discomfort. Also, my eyes have been burning. I do plan to see a doctor if I don't start feeling better in a day or two. I'll make sure he records that I think I'm reacting to the spraying.

Thank you for collecting the information.

Greetings,

On Tuesday September 18th my whole family woke up with SEVERE headaches, sore throats, coughing, and fevers of 103.5 ! We went to the pediatric department in Santa Cruz County where we were informed the flu was going around, however nothing of what we all had, what we all woke up on the same day to have. I mentioned the spraying in Monterey County and she said to call health officials. She documented the symptoms, checked for things of the common cold or strep throat... all came out clean. She mentioned the spraying on the doctors & patient documents. (To which I have a copy) I have done my research and made a report. The spraying was done 15 - 20 miles from my house in Gilroy. With the winds in Monterey and Gilroy we truly believe some of the residual spray has made its way here.

Can you please tell me how long these symptoms last ? If you have gotten any other cases in Gilroy or Santa Clara County ? If not can you research that ? I am not sure if people are going to the Dr. or reporting it as I did. Thank you .

Hello. I am writing to report that the day after the overhead spraying, I developed a definite sinus condition. I've never had anything like it. My nasal membranes were ultra sensitive which I thought it was odd, then wondered if it was related to the spraying. When the LBAM pheromone spray program was announced, I was very concerned with its long term application and environmental affects, never imagining that I would be physically affected by it the very next day! This illness has not gone away as I expected it too. The problem has now settled into my ears and I have vertigo. If it doesn't get better soon I'll have to go to the doctor. It just seems a little too coincidental to me. I was in bed all day today because of dizziness. Who will give me back my time? Jana _____ P.O. Box ____ Pebble Beach 93953

Mike _____ <_____@mbay.net> wrote:

My wife and I were concerned about the possible side effects from the spraying that we left the Monterey Peninsula on that Sunday, Monday and Tuesday and went to the Sierra Mountains. We returned on Wednesday, thinking that we missed the spraying but they sprayed our house in Pacific Grove on Wednesday night.

My wife awoke during the night on Wednesday with her eyes and nose running and then she heard the planes flying over our house, about the same time. I also woke up when I heard the planes, they went over the house 3 times that night, on 9-12-07, between 11:20pm to 11:45pm. My wife continued complaining about sinus congestion and was sneezing on Thursday, 9-13-07 and Friday, 9-14-07 and Friday, I started sneezing too. On Saturday I started sinus congestion and cold like symptoms. Both my wife and I have been ill since, with what we have believed to be a bad cold or flu. I have not been able to work since last Friday, 9-14-07, due to the illness. My symptoms seem to be about 2-3 days behind my wife's symptoms.

The symptoms we both share are: sneezing, sinus pain and congestion, running noses, headache, sore throat including pain into the ears, feeling cold and having to bundle up at times, sub normal temperature readings, nausea & diarrhea. All of these symptoms are cold/flu like. The congestion lasted about 3 days and then the sore throat then headaches started with the nausea & diarrhea following. After about 5 days from the start of the symptoms, we each started feeling better but day 6 and 7, we have the nausea & headache problems back. I have been around my son, my employee and office staff a week ago and they were exposed to my "cold". We did not realize on last Friday that we were ill. After almost a week now, my son and staff do not have any symptoms.

My son called me today (he lives in Marina and does not have any sickness signs) and told me about the article in the Herald on 9-19-07 about people complaining of illness since the spraying. Up to this moment, I did not consider it a possibility of our illness being caused by the spray.

I am sending you this email to try and find out if our symptoms are what is being reported to you by other local people.

Any assistance would be appreciated. Thank you and I wish you all well soon.

"Melody _____" _____@advanceamerica.net

I live in Preston Park in Marina with my 2 adult children and 2 grandsons.

I first had a reaction on the insides of my arms and under my chin. I had a visible rash/hives. The bumps were like welts and could be felt with your fingers and easily seen. My youngest grandson, Keanu, who is 3½, had a few bumps on his tummy and chest. He had 2 nights where he woke up with a fever of around 102 degrees that ran from about 3AM until late morning. Last Sunday I had a severe allergic reaction and sneezed non-stop from about 3PM until close to 10PM. My nose was bright red and 2 days later the skin peeled off my nose. Not an attractive sight. My 20 year old daughter had a morning of what felt like asthma which she has not had since we lived in the San Joaquin Valley almost 9 years ago and my 29 year old son and the father of the boys, had 2 days where he was sick to his stomach. We did not go to the doctor for a couple of reasons:

- We cannot prove these are reactions to the spraying, although they are the only "new" issue we have been around.
- I don't want to pay my insurance co-pay to see my doctors for something that WE may believe but the government will be more than likely inclined to blame on everything else. Our doctors are in Capitola and I have a feeling we may be better believed in Santa Cruz County than here, but others may see them as Santa Cruz activists.

- I don't want to be an alarmist or over-react to something that we treated with Tylenol and antihistamines. We didn't stay home from work or miss any school.

Rumors are flying that the spraying will cause sterility in male children and with a 5 year old and 3 year old in the house- and one attending a local grade school, I am concerned that years from now we will be kicking ourselves for not taking a stronger stand against the government AKA "the man."

What can we do to make a difference? I am ready to get involved.

Dana W <_____@hotmail.com> wrote:

A number of people I know had ill effects of the spraying, myself included.

I live in the valley but spend several mornings a week in Monterey. The mornings following the spraying when I was in town were pretty bad. I developed a runny nose, sore throat (and my throat felt swollen). I had a wicked headache for days. Towards the end of the week I felt achy.

I know several people that woke on the nights of the spraying with severe headaches and nausea. None of these folks suffer from headaches generally.

A man I work with who has two young children, ages 6 and 10 months, both became ill with nausea, sore throats and runny noses as did his wife. His wife's throat was raw, felt swollen and she experienced burning when swallowing. The three of them ended up in seeing their doctor.

I sat next to a man from Pacific Grove during lunch one day and he said he was nauseated, had a runny nose and felt generally bad. He was so concerned he had sent his wife and kids out of town for the duration of spraying.

Several family members of mine living in Monterey complained of increased sinus and allergy type symptoms.

I found it odd the newspaper reports were minimizing any ill effects from the spraying. The fact that the ER and doctors were saying the people they saw were not related to the spraying is absurd. And, not all people affected went to doctor's. I certainly didn't need my doctor (whom I trust) telling me it was just coincidental.

I am concerned about the broader, longer term effects.

Hello,

I just read the article in Wednesday's Herald and I wanted to let you know of my situation.

I live on the top of Hellam Street in Monterey and began experiencing symptoms last Thursday...sore throat, muscle aches, extreme tiredness, etc. By Friday I could barely talk or move...I also had medium severe back and stomach pain on Saturday night through Monday morning (so bad I had to sleep in a recliner Saturday night. I started feeling better by Monday, but am afraid that the next round of human guinea pig spraying will include another 5 days of extreme discomfort. Please let me know if I can do anything to help the cause.

By the way, my wife just told me yesterday that she also experienced a sore throat and headaches beginning on Sunday.

I returned on the morning of the 13th (right after the spray was completed). I sprayed off the walkways and equipment and my children's school in Pacific Grove. After 2 hours of cleaning, my nasal passages were burning. The teacher at the school next store was complaining of burning in her eyes.

I called CHOMP to see if they had any other reported reactions. They referred me to the Poison Control hotline. When I called, the woman at the Poison Control hotline looked up the chemical,

CheckMate OLR-F. She advised me to wear a mask while cleaning, especially so soon after the aerial spray. She also advised me not to water down my house right away to prevent more aggravation. When I told her that I had children, she then told me that she recommended I spray off the outside of my house, but to wear a mask.

The burning in my nasal passages and sinuses lasted for about three days following. I did not go to the hospital or a doctor, as I knew there was nothing that they could do for me. [Why waste the money?]

My son also complained of irritation in his nasal cavity when outside.

As time goes on, the particulate in the area seems to have less of an effect on me than it originally had; but some people claimed they could "smell" it. It was irritating to go outside for 2 weeks after the aerial application. I'm not sure if it was a propellant that was used or the polymers themselves. It just seemed very "dusty", for lack of a better word.

Furthermore, as far as psychological issues.....for a week + (before and during the spray), I was having nightmares of the planes flying over my house. I would wake up sweating. I did leave town during the aerial application. The thought of this "nightmare" actually occurring was unfathomable, especially in a town that I grew up in.

Mathew <_____>@sbcglobal.net> wrote:

During the week of the aerial spray, I suffered from sore throat, headache, severe fatigue and muscle aches. I also felt a distinct lack of clarity. I believe that these symptoms were due to the spraying, as they were unlike anything I have ever felt before. I felt a strange and unusual fatigue in my body and just sick all over -- very difficult to concentrate and keep my focus when riding my motorcycle, too, which was dangerous enough to keep me from riding again. I've never experienced anything like it. I did not go see a doctor because I could not afford to take the time off from work and I really didn't want to pay the \$35 co-pay either, but I felt really miserable for over a week. I am just now starting to feel better. The guy I work with had no concern whatsoever about the spray, and even he felt a sore throat and chest congestion. By the way, there were no birds flying around my house during the spray -- normally there are lots. I saw bees flailing around near the ground, too. Pretty scary for the planet. Thanks -- Mathew _____

Dear Rep. Laird

I would like you to document my reaction to the spraying. I live in zone 2 in Pebble Beach. Since the morning of the 14th I have had flu like symptoms, constant headache, swollen glands, and a slight sore throat. I will go to the doctor on Monday, but I rather think there's nothing to be done. I am a 58 year old woman in excellent health, and didn't want to think I would be affected, since I took many precautions to not breathe the spray directly by getting out of town that night (and the two nights before, as we were never sure of when our area was going to be sprayed). As the entire 60 square miles of our beautiful peninsula were blanketed, and the microscopic particles which are continually emanating pheromones, I suspect that, despite my efforts, I must have breathed in some particles which undoubtedly are still in the air, on the streets, etc. I do hope that as our elected representative you will be able to convince the powers that be to NOT spray us anymore. I really hate being part of an uncontrolled experiment. It is not fair, and basically unAmerican to do this to us, given that alternatives do exist for treating this moth problem, but which are 'too expensive'. Too expensive for WHO? Certainly the long term 'cost' of the unknown long term damage being done to our bodies, which are not even being monitored, is not acceptable to the public. I have never felt so unrepresented by our government in my entire life. Please do what you can to stop this madness.

Thanks,
Sincerely,

Hi ,

We were away when they sprayed our area. we returned
for the last night of spraying, being unaware that the
spraying had been extended from the original 3 days.
Wed morning, I dropped off my son at Bayview
Elementary at which point I was informed that the
school had been sprayed the night before. I started to
hyperventilate and could feel the toxins entering my
body. My lungs felt cold and tingly. Being very upset
I went home then came right back having decided to
withdraw my son from school for the rest of the day.
Later on that same day, around 11:00 am I developed a
severe headache which lasted for seven hours. There is
no doubt in my mind that this headache was caused by
the spray because the last haedache I had was 3 years
ago. The following day my husband Warren got a headache
which lasted for two days his nose was running like
crazy and my nose started to run and I was sneezing
alot. He also had a sore throat which lasted for
several days. Thankfully, our children seemed not to
experience any effects. We will definitely have to
leave town again if they spray again. This is a big
problem for us because my husband is an artist and
cannot work on his paintings if he is away from his
studio.

Just want to report my own reaction. I am 80, with a strong immune system, not at all susceptible
to infectious diseases and have never had respiratory allergies and so I did not expect to be
personally impacted by the spraying, especially since I stayed indoors with the windows

closed. When I began coughing the next day, I did not connect it to the spraying in my mind. It reminded me of a persistent dry cough I had from some high blood pressure medication I was on some years ago. I was trying to think which of the numerous medications I take could be the culprit – the most recent addition to my pharmacopoeia was about a month ago – seemed a little long for this effect to be showing up. I coughed for two days, frequently and outrageously and then it stopped. Then someone asked me if I had had any effect from the spraying and it dawned on me that that was what the cough was all about. It has not returned. The plane flew back and forth directly over our house at least three times. I could see it through our big windows. Then we heard it make about 20 more passes in the neighborhood. That was Tuesday night.

I would like to inform you that I have had adverse reactions that stemmed from the spraying of what we were told was allegedly "pheromone" which contributed to an adverse reaction in my body. My Mother and my 9 year old son have also experienced reactions along with me.

My Mother and I have experienced general fatigue and low energy. I have had intermittent sore throats since the spraying occurred that still continue to the day of this correspondence. I also have experience lightheaded dizziness intermittently. My son has experienced cold like symptoms that did clear up.

I have been informed that the spraying did endanger a young child and an elderly woman who did require medical intervention through hospitalization.

Motivated by a respect for human rights and what is decent morally, ethically and legally I appeal to you. I appeal to you as a Mother of a nine year old son, whom I am responsible for. I ask you "what would you do if your child is next to inhale this product for 30 days at a time: your own hometown is next in line to be sprayed, not just once but many times ?"

Thank you for your time,

My reaction may not be physical, but mental. How in the world can we allow our government or any agency to spray chemicals on us. How is it

possible in an apparently so called democracy for this to happen to us without our permission. And who in their right mind would say "yes" to

such an event. We must remember that Agent Orange, DDT and etc. were also once determined to be safe. I so resent that this could take place

without our permission. If this can happen - what is next? Even if people are not immediately affected by this - who is to know what affects in the future may be attributed to this. We had our little 4 month old grandson with us when the planes flew over our home. Who will be able to say that a possible future illness in his life is attributable to this - will those that determined to do this to us be around to say "Oh we are so sorry", and if they were, would that be enough to cure him or anyone?

Subject: Aerial Spraying symptoms

Hi Mike,

I just wanted to share with you that I too have noticed cold like symptoms since the aerial spraying was done. I've had a bit of a cough and sore throat as well as some congestion in my chest. My son Kyle has exhibited similar symptoms. Although it hasn't been enough to keep him out of school, it has been more of a nuisance and I thought I would pass this info along. Thanks for all of your efforts in trying to postpone the spraying until further testing can be completed.

Sincerely, Ellen _____

Mon, 24 Sep 2007 14:22:58 -0400

To Whom It May Concern:

I'm concerned about the Aerial Spraying that has taken place within the last few weeks & that is scheduled to continue to take place on our peninsula. I'm a Monterey resident & my home is located on Roosevelt St., just below the Presidio. When the spraying took place in Monterey & then Pacific Grove/Carmel the next night, I began experiencing a sore throat & headaches about a day later. At first I thought I was coming down with a cold, but I put two & two together once I noticed that my symptoms did not follow the pattern of a common cold. The symptoms were a result of the spraying of chemicals in the air!!!

Whatever the chemicals are, that were released in our environment that week & that are going to continue to be released, are clearly not safe for human beings to be exposed to.

It appalls me that people are more concerned about the the crops that are supposedly being destroyed by the apple moth, than they are about the health & welfare of our area's residents. What good are crops if the consumers of these crops become sick or worse, possibly die???? "Experts" have no idea what type of long-term, harmful affects this could have on our community!

Sincerely,

Alyssa _____

THANK YOU for asking about any reactions to the pheromone spraying.

I had a terrible headache from Thursday September 13 until it finally faded away in the past 24 hours. Before then, I tried a variety of pain killers, acupuncture, massage, cold packs and chiropractic care. Nothing alleviated it. I normally very rarely get headaches, and when I do, 2 Bufferin will knock it right out.

It is significant that I went to the bay area from Tuesday Sept 18 til Thursday Sept 20, and the whole time I was out of this area, I had no headache at all. When I returned, it returned within just a few hours.

Others have reported to me flu-like symptoms, including muscle aches and diarrhea. Seems awfully early for flu season. Perhaps you can't take second hand information. I will try to get this e.mail address to them, but many don't have e.mail. Is there a phone number they can call?

In addition to my physical symptoms, it was terribly unnerving to have the planes buzz our homes. I knew it was going to happen, but was quite taken aback when it actually happened, because I had no idea how intense it would be. One night, for 2 solid hours, the plane flew directly over my house on an average of every 90 seconds. (I watched the second hand on my clock.) This seems to me to be overkill. How much spray could possibly be necessary?

On Thursday morning Sept 13, the Herald said the spraying stopped the night before at midnight due to fog. It actually went til 12:30 a.m. over PG, and Carmel residents say it continued well past 1:30 a.m. So I believe it is good for citizen groups such as this to check the facts independently. Everyone I've spoken to at the Herald is certain there is no reason for concern, and even appears to scoff and anyone concerned.

So THANK YOU FOR ASKING!

Steven _____ " _____ [@gmail.com](#)

Sir:

The short answer is that I have and continue to suffer from chest pains, sore throat, irritated tongue, and I have sensed a funny taste and smell in the air.

Some background:

The day the spraying started, I went to stay with a friend who lives near River Road in Salinas. The windows were shut that Sunday night. There were no problems. On Monday afternoon I went into Seaside to check on some automobile repairs, was there about an hour and had to leave. I developed a sore throat, chest pains, tingling sensations in my mouth. I went back to Salinas and went inside and the symptoms cleared in about three hours. A few days later I went into Pacific Grove and the Country Club area of Pebble Beach where I live and I had to leave with the recurrence of the symptoms. Again, I went inside in Salinas and the symptoms cleared after the passage of some hours.

I returned to the Country Club after the spraying was completed. I remained inside until I needed to do business in downtown Pacific Grove where my symptoms were aggravated. Went to sleep on Friday the 21st and was sure that I was going to leave again in the morning. When I awoke the next day I noticed that my throat was not sore and my chest did not hurt. I went to the window to check what was going on and saw the light rain. It was clear to me that the rain had given me relief.

Some people are sensitive and some are not. It does not help when a city official says "that things are back to normal - birds are not falling from the skies." It does not help that prominent people on the Peninsula who can generate media coverage against this spraying do not speak out because they are not sensitive to the sprays or to the situations of their neighbors. It does not help when the medical community does not take a lead in opposing this spraying because some industry or government "authority" sanctions it. It does not help when the laws of our society protect the current structure of the agriculture industry more than the health of its citizens.

It does help give the citizens of the Peninsula some insight into the problems and frustrations of people living alongside the "government approved" spraying of crops, the members of the armed forces living with the aftermath of the "safe" anthrax inoculations, or the the people of Irak living with the "harmless" residue of depleted uranium.

Thank you for caring.

Hello:

I just wanted to let you know that I am a local Monterey resident who has experienced sickness as a result of the spraying.

I'm fairly sensitive to chemicals, medications, etc. and I began feeling unwell the day the spraying first occurred.

My symptoms included: aching, muscle pain, tiredness, dizziness, dryness of the mouth (felt dehydrated) and eventually a severe sore throat.

I went to the doctor, who thought it might be the start of a sinus infection. I was put on antibiotics but my symptoms didn't clear up until just yesterday. I believe it was because of the spraying and am very concerned about the next planned spray to occur in our area.

I am planning to receive copies of my doctor's visit and would like to assist in local campaign efforts to stop the spraying.

Please contact me should you need additional information.

Thank you,
MacKenzie

_____@comcast.net

I am one of many local folks unhappy with the spraying. I did a considerable amount of research on Checkmate ORL-F and decided to leave for several days with my family (pulled our youngest out of school) and our pets. This did not help. Upon arriving home to wash down our yard, roof and prepare to deal with the residue I go sick. I do not get sick often (Moms rarely do) and I had an asthma attack that turned into bronchitis. I have documented this with my doctor. I also developed some sleep disorder. One unconfirmed piece of information that I have learned (from a physician in Santa Barbara) is that the pheromone used in the spray can cause sleep disorders in people. It is a generic pheromone and apparently can affect the environment in more than one way. I have also heard this particular pheromone can harm invertebrate sea-life(abalone) and disrupt the food chain of the Monterey Bay sea otter. It is worth researching. I simply did not want to be here for the spray because the web site used by the makers of Checkmate revealed that neither the makers of the spray nor the federal EPA have approved the spray for residential areas. Only the California Department of Food and Agriculture have approved it , in an effort to create a cost effective method of wiping out the moth. This is no excuse to begin experimental spraying.

I guess if I had not gotten ill, as did many other people that I know who wiped down playgrounds and schools for their kids here on the peninsula, I would lobby less stridently against experimental spraying. I am angry and shocked that our governor would let this continue. There are safe methods to attract the moth to applicators with the pheromone inside and the spray could be used in agricultural areas as needed. Why our homes!? The moth has been here at least for several years to

have spread to 11 counties Thank you. Janet _____

"oriana _____" <_____@yahoo.com>

My family and I have suffered both physically and financially adverse reactions to the experimental spraying of chemical pheromone to confuse the mating cycle of the LBAM.

After a lifetime of residency in Monterey, I was forced to flee my home with only several days to prepare while six months pregnant, in order to avoid my unborn child and I being unwilling participants in the first human test group for this unprecedented long term aerial application.

As this experiment of agribusiness is planned to continue repeatedly for years, and the only means of preventing it according to Secretary Kawamura, is to PROVIDE EVIDENCE OF ITS HARMFUL EFFECTS WITH OUR VERY LIVES AND THOSE OF OUR CHILDREN AS THIS CHEMICAL HAS NEVER BEEN APPLIED TO HUMAN POPULATION, OR AREIALLY, OR LONG-TERM - my husband and I quickly made plans to move. Without adequate notice, we were forced to pay double rent in two different counties for a majority of the month. This caused us to go into debt.

Due to the physical demands of this endeavor of displacement as well as the psychological stress, my heart rate began to speed rapidly, bringing on a state of elevated blood pressure deemed unsafe to me and my unborn child. Unfortunately, I cannot keep my regularly scheduled visits with my ObGyn, however, due to the presence to chemical pheromone designed to confuse reproduction. I am forced to quickly find other medical providers for my stress induced condition due to my health being endangered without adequate notice to or with assistance for necessary relocation.

If Secretary Kawamura were to factor the human costs into his financial equation, and were willing to ethically make provisions for citizens forced into his heretofore non-existent proof-of-human-harm-group as Monterey County residents will be the very first exposed, the Secretary would surely find the cost of exposure to far outweigh the cost of agribusiness.

Lastly, I wish to remind the Secretary that breast cancer has a hormonal causation and that chemicals of all sorts are read by the breast receptors as estrogen. Elevated estrogen levels create the environment for breast cancer to develop and flourish. Of all developed nations in the world, more American women die from breast cancer. This has been linked to our rampant and irresponsible use of untested chemicals deemed unsafe by other developed nations. I wonder for whom the Secretary works. Surely it is NOT the citizenry.

My rights as an American have surely been trampled. I am horrified, terrified and outraged.

Sincerely,
Amy _____

"Maureen _____" <_____@ci.monterey.ca.us>
Hello,

I am happy to hear you are gathering information. I have experienced burning eyes, sore throat, headaches and extreme fatigue since the spraying started. I want them to stop. I have heard a number of people complaining about the same thing.

Thank you.

Maureen _____

Tue, 2 Oct 2007 14:09:31 -0400

"James _____" <_____@gmail.com>

To Whom it May Concern,

Name: James _____

Address: 389G _____ Rd. Monterey, CA

Effects of Spraying: I had a sore throat for two weeks. My wife had a sore throat and common cold symptoms for two and a half weeks. Our five year old son had a sore throat for approx. 10 days.

We have currently moved out of the state. If there are any questions regarding this issue, then please call me at 831-_____.

Thanks.

Jamie

"CHAD _____" <I_____@att.net>

Hi,

I've had a soar throat, cough, aches, cold like symptoms for the past two weeks. It hit me the hardest about a week ago when I was in Carmel Valley for the weekend. I live in Monterey near the Embassy Hotel. If you have any information that is useful please let me know, because this is affecting my daily life.

Thank you,

Chad _____

831. _____

Subject: Re: Have you had an adverse reaction to aerial spraying of CheckMate OLR-F/LBAM-F

Yes, My children and I did have physical reactions during the aerial sprays.

I did not feel that the reactions were to severe, although, we all did have complications during breathing, feeling heavy in the chest area, and coughing there after. I felt that there was residue on my car, where we seem to have the most experience of reactions.

Thank you for asking

Name Dr. Amy [redacted] ☒ Keep Name Anonymous (Blacked out in copies)
Age 52 Gender F (Male/Female) ☒ Keep Personal information Anonymous

Date & Time symptoms began September 14, 2007-

Geographic Location where you first experienced symptoms Monterey, Surf Way

Symptoms and Duration of Each Symptom – (example “face turned red” – started Thursday at 11:am)

I was camping at Laguna Seca when the aerial spraying took place. I am a “sensitive” individual; to various medications and synthetic products such as Ivory Snow Laundry Soap, tanned leathers, dyes, etc. I experienced a severe rash on more than $\frac{1}{3}$ of my body for almost two weeks. During spraying, we were instructed to remain indoors however I was camping in the region and this was impossible.

Any Previous General Health Problems (such as asthma, weak immune system)

I am allergic to medications, fragrances, artificial dyes and synthetic substances. I have sensitive skin.

Were you aware of spraying before symptoms began? ☒ (Yes/No)

Did you Hear Planes Flying Overhead ☒ (Yes/No)

Any other relevant information --

I realize this was “an experiment” and worse substances beside pheromones are sprayed in the region, however I suffered a very severe rash.

Signed Amy [redacted], Ph.D.

Date signed October 7, 2007

☐ Keep signature Anonymous (Blacked out)

Perhaps this rash was a coincidence but I have had reactions to pesticides and herbicides in the past. Thankfully, the rash healed within two weeks!

It was horrible. It was as if it were systemic! It spread and caused redness and swelling.

It is very difficult for people to get out of the region who were camping and preparing to move in to a residence in the area. We were camping when aerial spraying took place. I have no idea if others suffered similar allergic reactions. It was miserable. Sensitive individuals are certainly at risk when aerial spraying is conducted. The public has a right to know and prepare. If I knew that aerial spraying was being conducted in the region when I did not have a residence, I might have delayed my trip and plans to relocate to Monterey.

Sincerely,

~~Jimmy~~ [redacted] Ph.D.

Thank you for your responsible and concerned proactivity and attention to this matter.

Name PAM [REDACTED] ☒ Keep Name Anonymous (Blacked out in copies)

Age 60 Gender F (Male/Female) ☒ Keep Personal information Anonymous

Date & Time symptoms began Sept. 10, 2007

Geographic Location where you first experienced symptoms my home and backyard

Symptoms and Duration of Each Symptom - (example "face turned red" - started Thursday at 11:am)

Sore throat and congestion. I still have
congestion 2 weeks later. I usually do not
get headaches, but I have had several headaches
right after the spraying.
I lost 3 nights of sleep because of the planes
flying over my house & could not function or get to work
due to loss of sleep.

Any Previous General Health Problems (such as asthma, weak immune system)

I do not have a weak immune system - So getting a
sore throat and congestion was not normal for me.

Were you aware of spraying before symptoms began? Yes (Yes/No)

Did you Hear Planes Flying Overhead (Yes/No)

☒ Any other relevant information -- Flew over my house for 3
Nights in a row - Monday, Tues, & Wed. Disturbed my
Pets and kept me awake until they stopped flying - 1 AM or
Later

Date & Time

Symptoms began the day after the spray- though at first I didn't connect the two as I did not think I would react to this spray. _____

Geographic Location

where you first experienced symptoms
Jacks Peak, Countyof Monterey

Symptoms and Duration of Each Symptom – (example “face turned red”– started Thursday at 11:am)

First day, around noon, extreme nasal tingling, very new to me sensation, congested sinus for the next two days which moved to my ears with extreme itching and fullness and then developed into vertigo. Reaction lasted about six days, with one day in bed because of vertigo. I felt really terrible until it RAINED! I didn't connect the weather and the condition but thought maybe the spray particles were temporarily “grounded” Haven't had any symptoms since. But am fearing the next spray and do not know how this will affect me with multiple sprayings. I feel terrible for the very young, old and people more chemically sensitive than I am. Also sometimes when one has allergies, continued exposure can worsen conditions over time. I am VERY allergic to perfume and am wondering if that is what caused this strange reaction, even though “experts” say humans cannot smell the pheromone, it is THERE and humans do react. I am ashamed that the ag business doesn't spend more money and eradicate the pest a safer way, if they must. For once I have first hand knowledge that this aerial spray operation is about big money. This makes me very sad.

Symptoms and Duration of Each Symptom – (example “face turned red” – started Thursday at 11:am)

SAT SEPT 22: TODAY IT RAINED, IS RAINING. WE NOW HAVE THE STUFF RUNNING INTO OUR OCEAN AND BAY, AS THE RAIN WASHES OFF THE PHEROMONE THAT WAS ON ALL TREES, PLANTS, GROUND, ETC. OUTSIDE I NOTICED A FOAMY SUBSTANCE IN THE STREAM OF WATER RUNNING DOWN OUR STREETS IN PACIFIC GROVE! AND OF COURSE IN CARMEL, WHERE THERE WAS ALSO SPRAYING, IT IS PAINTED ON THE SIDEWALKS WHERE THE DRAINS ARE: “NO DUMPING. FLOWS TO OCEAN” OBVIOUSLY THIS MEANS THAT AS THE RAIN COMES, SO DOES THE WASHING OF THIS STUFF OFF EVERYTHING AND IT IS BEING DUMPED INTO OUR OCEAN AND BAY!!! I HAD A SCRATCHY THROAT, ITCHY EYES, COUGHING, NAUSEA, AND SYMPTOMS FLARED AGAIN WITH THE RAIN.

ENOUGH!!!!

Date & Time symptoms began Friday, Sept 14, 2007, approx. 9:00 pm

Geographic Location where you first experienced symptoms

At home in Pacific Grove (Forest Hill area, between Safeway and the Presidio)

Symptoms and Duration of Each Symptom – (example “face turned red”– started Thursday at 11:am)

Severe coughing fit – started Friday, lasted about 1 hour

Severe, shooting stomach pains & nausea – started Saturday, 6 pm, lasted about
3 days, tapering off in intensity

Sore throat – started Sunday mid-day, lasted a couple days

Nasal congestion – started Sunday evening, lasted a couple days

Any Previous General Health Problems (such as asthma, weak immune system)

No.

Were you aware of spraying before symptoms began? Yes (Yes/No)

Did you Hear Planes Flying Overhead Yes (Yes/No)

Any other relevant information -- I work in Cupertino, commuting every day, and didn't have any contact with the outside environment, other than going between car and house, in Pacific Grove for the whole week after being sprayed on Monday night. I spent a short while outside on Friday evening. I spent Saturday playing in our yard with my 4 year old son, and then we went for a long (3 hour) walk on the Rec Trail in PG on Saturday afternoon.

I declare under penalty of perjury under the laws of the state of California the foregoing is true and correct.

Executed this 2nd day, October 2007 at Pacific Grove, California.

Subject: Asthma problem

Mike:

I know what I am about to say probably won't help much with the effort to end the sprayings, as we have not been to a physician to document our experience over the past month.

My wife, Janis, has had asthma problems for many years. We have gone to doctors for help and treatment of her asthma, but not for several years. The reason is that we have found alternative medicines that are more efficient in controlling her asthma. The doctors only offer prescriptions that have severe side effects and my wife just will not take the medications, unless life threatening, because of the side effects.

About 2 years ago, we discovered a way to help her with foods, minerals and homeopathic "medicine" that has been controlling her asthma. Janis very rarely has had any asthma attacks over the past 2 years. On 9-13-07, that all changed. My wife has had so much problem with asthma since the spraying that I moved her off the peninsula on October 9th to avoid the 2nd round of spraying. She has been with my daughter in Sacramento and her asthma attacks stopped within 2 days away from our home. She is still in Sacramento, as of this date without any asthma problems, and will be going to visit my sister in Fresno on this upcoming Wednesday. Jan and I were in Fresno with my family for a birthday party on 10-13 to 10-14 and she did not have any asthma attacks there either. I am keeping her away from Pacific Grove, hoping that her respiration system will "recover", so that she can come home again and enjoy her life without the asthma problem. I believe the carrier of the pheromone has been the problem for Janis, that little brown droplet that we found on our cars, windows, exterior walls, sidewalks and driveway and outside plants, just about everywhere outside. I have completely washed the exterior of my home, walkways while Jan is away and plan on doing it one more time before she returns, hoping to eliminate the "carrier". I don't have any way to test for the chemicals, this might be a waste of water and time, just trying anything I can think of to stop the problem.

I am planning on bringing Jan home on 10-21-07, unless they spray again. If they spray again, she will not be returning home until we believe it is safe for her to return and not suffer asthma attacks. I maybe forced to leave the peninsula also.

The other odd matter is that I have been suffering from asthma since the spraying also and I do not have a history of asthma. No, I have not gone to a doctor. We have learned to treat ourselves and within

the last 5 years, only go to doctors when we have no other choice. We have found homeopathic treatment for the illnesses we have¹ suffered that is much better than the prescriptions given through physicians. Of course, we are not idiots and will go to a physician with bacterial infections that we can not control or need help with. When I was in Fresno last Saturday and Sunday, I did not have any asthma symptoms. When I got home Sunday night, it's back, but not as bad as it was before I left. We have not, as yet, found the best way to treat the current asthma problems.

We are really hoping and praying that the spraying is stopped and never repeated anywhere again. We really appreciate your efforts to bring out the truth in this matter.

What can we do to assist?

Thank you.

Mike De Lay

27 messages from Santa Cruz citizens who complained of adverse reactions and illnesses following the spraying of the Santa Cruz area in November 2007.

These were posted on the Santa Cruz Sentinel website and are mostly anonymous. Their number has not been added to the complaints described in this report

sicko1t 11/9/2007 9:06 AM

I have asthma today. And there is a weird taste in my mouth. I am afraid to let my small pets outside, does anyone know if it is all right?

Tulip 11/9/2007 9:39 AM

My eyes do burn slightly, and my 4-month old baby had trouble breathing during the spraying last night, and I strongly oppose this action. Nevertheless, people need to take a deep breath and realize that it's not quite as bad as some here are depicting. Think about it: every single pass of an airplane overhead does not mean the plane was releasing the pesticide. Our house was obviously on the flight path back to the Watsonville airport for refueling, refills, or whatever. Plus, by virtue of working an effective grid, the planes have to backtrack on themselves many times. As for the sound, it was far less irritating than the nightly fireworks displays I wish the local police could get a handle on.

Midtownette 11/9/2007 10:01 AM

Walking home from a perfectly wonderful evening at our local neighborhood eatery last evening, a white plane flew overhead and within seconds, a chemical taste formed in the mouths of myself and friends. The plane or planes continued to fly over the Seabright/Branciforte area for over an hour. This morning, the taste still lingers even after several teeth brushings. I have a headache too and that is unusual for me. I'm very concerned about this product falling on my home garden that comprises 80% of my household's food. Seems hard to believe that all this expense to kill this moth is really necessary. The numbers of moths being caught are dropping due to colder weather. So if they aren't flying, they aren't mating, right - if that's the case, why are they doing this? Ugg - I hate this taste in my mouth - not even the morning coffee killed it!

Tulip 11/9/2007 10:26 AM

If my baby was still having trouble, I'd be rushing to the doctor. However, not everybody with resolved or minor lingering health issues can find the time or money to visit the doctor in order to procure the only proper documentation for reporting spray reactions. I don't want to expose the little guy to the flu in the waiting room, either! It's a shame there isn't another way to gather data on this...

Midtownette 11/9/2007 10:34 AM

BTW - I was well aware of the impending spraying via all the headlines and the literature mailed to my home. However, not to say there wasn't one, but I did not read any Sentinel article that said the pesticide would leave a metal taste in my mouth. So to suggest that the taste in my mouth is psychosomatic is ridiculous. I didn't even think the plane was one that would be spraying - silly me I expected to see the old-fashioned crop duster type planes! In any event, unsuspecting me said, ooh, there's a cute little white plane - ugg, now I've got metal mouth. Doesn't seem right....call the authorities and let 'em know you don't like the metal mouth or breathing difficulties. Even if you think it is trivial at this juncture and may not have any adverse effects at all, it's a good idea to document such events and their repercussions.

Monica11/9/2007 10:37 AM

Ugh. So sleepy after a night of loud planes coming, again and again, from about 1:30 until about 4:30 am. We live on Laurel Glen Rd. I was already deeply troubled that the spraying is happening because we can't prove that it's dangerous to our health. The burden of proof should be on THEIR shoulders to prove its safe. But I didn't anticipate how loud the spraying would be and how long it would last. Exhausted!

Millie11/9/2007 10:37 AM

Our government has failed us! We have no voice in this matter. I can't believe that in today's society you can spray an entire population and not worry about the long term effects on people, animals or the environment.

I disagree when they say its odorless, because I am house sitting in Scotts Valley and I smelled it and had a yucky taste in my mouth. And as an asthmatic I have been coughing up a storm!

mom of four11/9/2007 10:48 AM

I was not worried about the spraying because I survived the fruit fly spraying when I was young. Back then I thought it was exciting. We had to cover all of the cars. Sometimes, we would forget and then be reminded to cover everything because of noise from the airplanes. Then we would wash off the sticky residue that the spray left behind. I watched the planes flying around last night. They passed over my house at about 4:30am, I think. I shut my windows and the kids windows. This morning I have a head ache and my chest feels heavy. Could be from the spray...or just an oncoming cold. Hmmm. I wish the ag dept had tested the two unknown chemicals. It would make it easier to buy into their need to spray.

Marko11/9/2007 10:55 AM

If you are upset about this, not just the spraying of pesticides, but the utter invasiveness on our lives, being kept up until 3:00am and from I hear this will be repeated many many times over the next 3-4 years, this is not a one time applications.

Marko11/9/2007 10:57 AM

Sorry for the typos on previous post, a bit tired today from only 3 hour sleep.

scruzme 11/9/2007 10:58 AM

well news for you, I havent heard a bird all morning, my throat hurts and all is not okay for those of us awake.

FormerO.C. Pest Control Tech 11/9/2007 11:06 AM

Many of you who have commented sound like you live INSIDE. Try living outside and hearing those planes flying over at least 15 times! All that can be done is to huddle under a blanket or sleeping bag and hope that you have not breathed in too much of the nasty bug juice. I'd much rather be drinking and smelling Jamba Juice. Are us shelterlessly challenged going to be subjected to this once, twice or more?

I have been in the pest control business in the 80`s. There must be other ways to treat these moths so as not to endanger the health of us county residents.

I hope that all of you out there can get a good nights sleep the next time(s) that this spraying happens.

metalmouth 11/9/2007 11:08 AM

I just called the 800 number and documented the metallic taste in my mouth that doesn't seem to want to go away. The woman I spoke with recommended that others should document any reaction to the spray.
through the CDFA.

chy 11/9/2007 11:11 AM

The planes were noisy zooming over our house this morning. My husband woke up with a headache and then vomitted. I have a headache and a sore throat. Could be an oncoming cold, could be the lack of sleep from the airplane noise, or could be a reaction to the spray.

Tammy 11/9/2007 11:08 AM

So, last night I could smell something in the house even though my windows were shut... and my chest is burning! Perhaps, my issue is psychosomatic? Or is it because both of my girls are complaining that their throats hurt! Perhaps... they are getting sick from a cold or are worse poisoned? We will never know...

A Concerned Mother of Two and Resident of Santa Cruz!

mando morlos 11/9/2007 11:10 AM

I havn't been following the news lately so I was totally unaware of what was going to happen last night until the planes woke me up. (unfortunatley I didnt have my windows closed) I noticed a smell coming from outside, a few minutes later my wife had a headache and my eyes are still red /watering this morning.

OUTRAGED in S.Valley 11/9/2007 11:36 AM

They flew over scotts valley from 7:45 last night til 3:00 a.m.!!! I felt like we were the epicenter or something. I lost track of how many times, but safe to say at least 20 or maybe 30. I tasted something strange in my mouth almost immediately. I was trying not to over react but now I see I wasn't alone. My husband has a headache today and I have almost NEVER heard him complain of one EVER! This is CRAZY! I am going down to the clock tower this afternoon to protest, hope others will join. I feel helpless, voicelss,violated, outraged. ARRRRRGGGGGG!

Alwxandra 11/9/2007 11:38 AM

I was at work down town when they started spraying at 8pm. I counted 13 passes as the planes went overhead. I wok at The Well Within spa and people were in their out door hot tubs as the plains flew overhead. I had to go out in the spray to leave work at 9:30pm so I got a good does of the spray. The inside if my nose burned and I was wheezy. I saw all kinds of people walking around and hanging out like nothing was out of the ordinary. I know that I have been going through a lot of emotions about all of this and I want this to be safe and OK. But I feel sick today. I feel shaky and chilled and my muscles feel kind of tight. I feel like I have the flu, kind of nauseous.

Debi11/9/2007 12:58 PM

My family is totally outraged over the aerial spraying that is taking place in Santa Cruz. Where is the state of emergency? What damage has been done by these moths to warrant nullifying environmental review? If it is so safe and non-toxic, why are they not spraying waterways? We are extremely upset and feel very violated. Local politicians and governor should stop this now! My eyes are burning and there is an odd taste in my mouth.

Susan11/9/2007 1:58 PM

I just called the Governor's office.

I was told he appointed and supports the Department of Ag. and their decision. My nose and throat are burning. I did not expect this reaction. I am concerned. I am not a whiner. As for the people that call people on this post whiners, why do you read this material if you have to attack us. This is a serious matter. We have concerns and questions. This was never tested on humans. We do not know what they are spraying on us. I do not trust government officials in regards to safety issues. This really needs to be looked into by the people of this county.

eileen 11/9/2007 2:16 PM

I personally have felt little effect from the spraying- maybe slightly itchy eyes but, I also haven't been out much today. I am more concerned about the long term health effects that may be caused by breathing and ingesting these ingredients. There should be thorough testing BEFORE we are subjected to it.

feeling ill 11/9/2007 5:57 PM

mom of 4 says:

"This morning I have a head ache and my chest feels heavy."

Yes, me too. A sinus headache with nausea and a feeling that it's more work to breathe than it is normally. I live in Santa Cruz Zone 1. Those of us with symptoms are not hypochondriacs. Nor were those of us who smelled and tasted something strange during the spraying hallucinating. People have differing levels of chemical sensitivity. I have a chemistry degree and know whether or not I'm detecting a chemical smell. Please report all symptoms, everyone. Go to www.lbam.info.

bones 11/9/2007 6:06 PM

I don't usually add comments - only my second time. However, I live in Aptos and the planes were overhead for 2-3 hours. Then, I woke up this morning with a sore throat and red-itchy eyes. I don't have allergies and was fine the day before. This is very suspicious. Although I don't think I'll die from it - it seems that there are some side effects on the human population - despite what the powers that be are claiming.

sicko1t 11/9/2007 9:06 AM

I have asthma today. And there is a weird taste in my mouth. I am afraid to let my small pets outside, does anyone know if it is all right?

Efren Adalem 11/9/2007 8:19 PM

Went home last night to hear the plane overhead. I was in my car but someone I work with was walking home as the plane swooped and sprayed overhead. He came to work this morning with his face swollen red with blotches of redness and spottiness. His neck covered by his scarf showed no signs of the reaction. This cannot be good.

rlc 11/9/2007 8:22 PM

woke up with a sore throat..
and now my tummy hurts.
Anyone else have sore throat?

rlc 11/9/2007 8:23 PM

Woke up with a sore throat.
Now I have a tummy ache.
Anyone else have a sore throat?

SC 11/9/2007 9:18 PM

I am soooo sick from this spray. For four nights, I kept my windows shut and it got so stuffy I opened one and then forgot about it until they had done 6 passes over my house. They sprayed on Thurs. Today, Friday, I am having respiratory problems and tachicardia. My lungs feel irritated and swollen, I have shortness of breath and my pulse is racing like a toxic reaction. I am so upset about this. I went to the emergency clinic and the doctor said there was nothing I could do except leave town. Now, I am having trouble breathing. Get ready for a fight AG. business, you think you were losing money from the moths, wait till you see what Santa Cruz does.....

49 messages from individuals and families with chemical sensitivities, asthma and impaired immune systems pleading with the State of California to not endanger their health. These are not symptom or illness reports; rather, they are impassioned pleas from citizens vulnerable to pesticides and other toxins and chemicals. These messages came in via an online petition on stopthespray.org. They are not included in the total number of complaints in this report.

Signer's Name: Kelly _____

Gender: 2, Age: 37

Location: Santa Cruz, CA 95060, US

Comments: I moved to Santa Cruz years ago to benifet from the clean air. My son has asthmaand allergies and this place seemed like such a safe haven. The American Lung Association grades most cities every year for air quality, and Santa Cruz recieved an A. Lastnight starting at 8pm a very low flying plane cruised over my home. I had no idea that the spraying was going to occur, so I was very concerned about the plane. I am fearful of how my son will react to the spraying. I am really upset that this happened and I was not informed. I think that it is rotten that we are being used as guinea pigs. From what I have read this chemical has never been used in a residential area, and the long term health affects are unknown. I would like you to know that I am angered and saddened that the one place that was safe for my child to breathe has now been compromised. Please DO NOT allow this to go on. It seems that as citizens we should have a right to decide if we want to be sprayed. Thank You, Kelly F.

Comments: please DO NOT SPRAY SANTA CRUZ COUNTY I have 6 children under 12 years of aage and 3 have asthma/ breathing problems

Signature #456

Signer's Name: Jacquelyn _____

Gender: 0, Age: 37

Location: Santa Cruz, CA 95060, US

Comments: Geneticists now show what many of us have experienced...that 30% of the Indo-European population do not have genes to clear environmental toxins. Stop this toxic trespass before it stops us! I get sick from many, many products and have doctor diagnosed Multiple Chemical Sensitivity. Others have asthma or other lung disease, or have impaired immune function, including people on chemo and HIV drugs. STOP THIS NOW! Traps work fine at getting LBAM.

Signature #648

Signer's Name: Donna _____

Gender: 2, Age: 0

Location: Aptos, CA 95003, US

Comments: i am extremely sensitive to chemicals and my daughter has asthma. i am terrified what this might do to us and am shocked this could take place in a place like Santa Cruz.

Signature #712

Signer's Name: Fleur _____

Gender: 0, Age: 27

Location: Aptos, CA 95003, US

Comments: Please don't make my asthma worse...its hard enough to breathe as it is!

Signature #1153

Signer's Name: Brie _____

Gender: 0, Age: 0

Location: Santa Cruz, CA 95065, US

Comments: i am outraged that we were not asked about this as a community, before having it dumped on our heads, in our lungs, waterways, and on our growing food. Personally i am very concerned about if my asthma will be exacerbated by these chemicals, as i have reacted severely to pesticide spraying in the past. Please stop this immediately and consider one of the other methods of dealing with this pest, such as sticky traps, ground spraying, or best yet, dispersal of sterile moths.

Signature #1176

Signer's Name: Geordie _____

Gender: 1, Age: 50

Location: Santa Cruz, CA 95062, US

Comments: My son has asthma. We are quite worried about the inert ingredient polymethylene polyphenyl isocyanate which is bad for asthma. Spraying an urban area with any sort of chemicals is never acceptable. There are other methods to control the Apple Moth.

Signature #1257

Signer's Name: Peter _____

Gender: 1, Age: 58

Location: Conway, MA 01341, US

Comments: Dear Assembly Member Mr. John Laird and Senator Mr. Abe Moldonado, As the parent of a daughter you lives in Santa Cruz I have immense concerns about the proposed chemical spraying and the short and long term effects on human and environmental health. I am doubly concerned because my daughter has asthma and also a compromised immune system

from the effects of lyme disease. At a minimum, I urge you to stop the spraying at least until a comprehensive study is completed that documents the potential health risks. Thank you for your time and attention. Peter _____

Signature #364

Signer's Name: Nancy _____

Gender: 0, Age: 0

Location: Sanger, CA 93657, US

Comments: What~are you, Arnold crazy, you disgust me!!!!!! I am environmentally sensitive and your deplorable behavior will be spread all over the US as I have friends everywhere. The spraying of any chemicals on anything is bad enough as we are killing the planet and ourselves, is this what you want for your childrens future.???

Signature #563

Signer's Name: Karl _____

Gender: 1, Age: 59

Location: Aptos, CA 95003, US

Comments: I am deeply concerned that the synthetic ingredients in this formula can have a potentially harmful impact on our chemically-sensitive patients. Many individuals including children respond adversely to extremely small concentrations of inhalant substances. The body does not always respond in a dose-dependent manner and small concentrations can adversely affect the body's internal regulatory systems. These facts need to be considered when proposing a widespread spraying of an untested substance over urban areas. As a holistic doctor, I am deeply concerned for the welfare of the more-sensitive members of our communities who have the potential for demonstrating severe adverse reactions. Please give this matter your highest consideration. ~ Karl _____, M.D.

Signature #903

Signer's Name: Alta _____

Gender: 2, Age: 38

Location: Santa Cruz, CA 95060, US

Comments: Don't put the burden of proof on the public. Prove to US that this is necessary and safe. Don't skip any steps when it comes to insuring the public's safety. I'm a mother of a young child and a pretty sensitive creature myself. I can't afford to blindly trust anyone with decisions that may adversely affect my family or myself. Our health is paramount. I'm not convinced this spraying is necessary or even that it will actually do what it's purported to do. Thank you for hearing us.

Signature #1012

Signer's Name: Nancy _____

Gender: 2, Age: 49

Location: Santa Cruz, CA 95060, US

Comments: I already suffer from autoimmune disease caused from working as an environmental auditor, enforcing the Clean Water Act. I am chemically sensitive from my exposure to chemicals from inspecting various manufacturing sites. I don't believe this pesticide to be harmless, the County's restraining order to stop the Spraying was denied because the County failed to show proof, but the government has no proof either that the spray is not harmful

Signature #1112

Signer's Name: Marianna _____

Gender: 2, Age: 63

Location: Soquel, CA 95073, US

Comments: This is important. Too many people will suffer from this spray. Please don't let it start. My husband has surgery Thursday and he has sensitive lungs. Please help.

Signature #1262

Signer's Name: Mara _____

Gender: 2, Age: 58

Location: Santa Cruz, CA 95060, US

Comments: I am very sensitive to chemicals and am concerned about untested applications of pheromones to large urban areas.

Signature #209

Signer's Name: Susan _____

Gender: 2, Age: 34

Location: Santa Cruz, CA 95065, US

Comments: I have a condition called Multiple Chemical Sensitivities and this spray will cause me to have to relocate out of Santa Cruz. I am a local Realtor, and active member of the community. This spray will make me very sick due to my delicate condition and could possibly even kill me. PLEASE DO NOT SPRAY FOR THE LIGHT BROWN APPLE MOTH OVER SANTA CRUZ COUNTY!!!!!!

Signature #223

Signer's Name: Barbara _____

Gender: 2, Age: 61

Location: Morgan Hill, CA 95037, US

Comments: I am a person with multiple chemical sensitivity syndrome. I lost my home and most of my possessions due to pesticide spraying (without my consent.) I ended up hospitalized with uncontrollable seizures. This is a major health risk to others with my disability.

Signature #429

Signer's Name: Alene _____

Gender: 2, Age: 67

Location: Chicago, IL 60618, US

Comments: I suffer from multiple chemical sensitivities and understand all too well the effect of chemicals on the body. It is not psychosomatic. That California would choose to spray chemicals on citizens without their permission is government out of control and is totally unacceptable. Government is to provide for the common good and this action is a failure of government. Private corporations are deciding what they want, and the interpretation of the law completely disregards the citizens. This cannot continue.

Signature #446

Signer's Name: Debora _____

Gender: 2, Age: 35

Location: Santa Cruz, CA 95060, US

Comments: I have multiple chemical sensitivities and do not look forward to months of being sick. Please don't spray our homes!

Signer's Name: amber _____

Gender: 2, Age: 60

Location: Soquel, CA 95073-1692, US

Comments: I had chicken pox with respiratory complications last year and my immune system is still in the process of recovering. Please consider me and people like me. There must be another way of handling this "pest." Many thanks! A. Jayanti

Signature #701

Signer's Name: Jennifer L _____

Gender: 0, Age: 0

Location: Capitola, CA 95010, US

Comments: I am quite concerned about this. I have serious health conditions including respiratory disease - and I have a 3-year-old child. Please do not spray us!

Signature #705

Signer's Name: sara _____

Gender: 0, Age: 37

Location: aptos, CA 95001, US

Comments: I have a very weak immune system and respiratory system. My physician has said that I will get adverse health response from the spraying. Please don't do it!! Thank you!

Signature #750

Signer's Name: anonymous anonymous

Gender: 2, Age: 81

Location: Santa Cruz, CA 95062, US

Comments: As an older woman (81 yrs) susceptible to lung problems, I URGE YOU TO STOP THIS NOW!! WE CANNOT AFFORD to ruin the lungs of others just because "someone" is concerned re the light brown apple moth! What would our forefathers have done - NOW you get the message!!

Signature #950

Signer's Name: Laura _____

Gender: 0, Age: 50

Location: Santa Cruz, CA 95060, US

Comments: I am disabled, due to a chronic immune disease. If this spraying has a negative impact on my health, I will be suing the state.

Signature #1055

Signer's Name: cecelia _____

Gender: 0, Age: 57

Location: santa cruz, CA 95062, US

Comments: I fight a daily battle to breathe due to multiple chemical sensitivity. Although I can leave when the spraying takes place I worry about those who may develop this condition from the spraying, especially children. I read that spraying will take place because a "twist-tie" method was deemed to expensive. Unfortunately, the potential health effects are out weighed by a bottom line. It does seem when power is taken away from the public, somewhere there is a monetary gain to be had at the expense of democracy.

Signature #1063

Signer's Name: Laurie _____

Gender: 2, Age: 44

Location: Santa Cruz, CA 95062, US

Comments: I am concerned about my poor lungs being affected. The long-term effects are not known nor is the effectiveness of this hormone known! The delivery system is still in Research and Development. No study was ever done on ag spraying over a populated city. The public has a U.S. Constitutional right to safety. Please reconsider and do more studies. The apples I ate from organic farms were just fine. No larvae, no bites taken from it. What is the rush? I am confused and just want some clarity about what's going on and I thank you for listening.

Signature #1097

Signer's Name: Barbara _____

Gender: 2, Age: 45

Location: Santa Cruz, CA 95060, US

Comments: My partner has been diagnosed with leukemia; where is the concern for those citizens with respiratory or immune system compromise who truly cannot "take the chance" that the ingredients used in this pheromone to make it sink, or stick to leaves, or whatever it does will not exacerbate these preexisting health issues? I have seen no article documenting the supposed devastation that this moth will wreak. This is wrong!

Signature #1127

Signer's Name: Dukh _____

Gender: 0, Age: 61

Location: Santa Cruz, CA 95062, US

Comments: We live in Santa Cruz for its pure air and environment. I am chemically sensitive and this is vitally important to me. I am concerned that a substance which has only been tested short term on rabbits will be used on us long term. I don't want to be a human guinea pig.

Signature #1151

Signer's Name: Megan _____

Gender: 0, Age: 37

Location: Capitola, CA 95010, US

Comments: Please do not spray us. I am very sensitive and I cannot afford to be sick right now. Please, please do not spray us without you testing it on other life forms first. This is absolutely wrong. Have a heart and soul and don't spray us! Thank you

Signature #1264

Signer's Name: Joan _____

Gender: 2, Age: 44

Location: Santa Cruz, CA 95060, US

Comments: We have a child , age 4, who has respiratory issues and we don't think it is fair to risk her health with the aerial spraying.

Signature #1516

Signer's Name: Kelley _____

Gender: 2, Age: 44

Location: Boulder Creek, CA 95006, US

Comments: I suffer from asthma and chemical sensitivity. I am very concerned about the impact spraying will have not only on my health, but the health of my family and the environment. I have a hard time believing that this chemical is not harmful to humans and that it won't affect other species.

Signature #1647

Signer's Name: Elizabeth _____

Gender: 2, Age: 37

Location: Santa Cruz, -- 954062, KH

Comments: My mother died due to complications of chemical sensitivity and I have a three-year old child with a history of respiratory problems. I do not want to suffer for an "emergency" that has not been proven. Please stop this injustice.

Signature #1715

Signer's Name: wilma _____

Gender: 2, Age: 63

Location: Sebastopol, CA 95472, US

Comments: People need to know about this before it happens. So many of are getting sick from all of the chemicals in our rnvironmrnt and food. I have multiple chemical sensitivities. If I were to be any where near an area that had been sprayed it would make me extremely sick. If I were outside in an area that was being sprayed IT COULD KILL ME. This is no joke.

Signature #1720

Signer's Name: Nancy _____

Gender: 0, Age: 37

Location: Santa Cruz, CA 95060, US

Comments: I have multiple-chemical sensitivity. Any exposure to any synthetic substance throws my system over the edge resulting in asthma, extreme fatigue, nausea, and body aches. It is already difficult to maintain symptom-free days by avoiding perfumes, cleaning compounds (most people wear clothes washed in clothes softeners which give me instant headache and asthma - just walking by in a store or on street is enough to set me off) eating only organic foods and drinking only distilled water. I have been staying away from home, over the hill in the East Bay, since the spraying was supposed to have started. I am afraid to go back home. I know that if my body disagrees with the chemicals it will take a lot of effort (changing my shoes each time I enter my house or car, washing off all outside walls and windows of my house, washing off all leaves and sidewalks around my house with high-powered water pressure (which I do not have ready access to), and always being conscious of where others may have tracked in the substance. As far as my life is concerned, this spraying has marked the end of freedom and democracy in America.

Signature #1753

Signer's Name: Tiffany _____

Gender: 2, Age: 37

Location: Santa Cruz, CA 95060, US

Comments: With one small child just over pneumonia and another small child with Autism and a compromised immune system - we left the county for a week. Quite the inconvenience for something that no one here wanted.

Signature #1849

Signer's Name: Ilyana _____

Gender: 2, Age: 60

Location: Berkeley, CA 94704, US

Comments: I suffer daily from the effects of chemical sensitivity, am no longer able to work due to it, and am therefore very afraid of how spraying might affect me, as well as many other people who are sensitive.

Signature #1274

Signer's Name: heather _____

Gender: 0, Age: 33

Location: Santa Cruz, CA 95060, US

Comments: I am pregnant due any day/moment and do not see the spray in my neighborhood. I fear for the health of my newborn's lungs. I would be willing to pay for the alternative, which I have heard is a trap/cage. I have heard that it is more effective but more expensive and much less hazardous to our health

Signature #1276

Signer's Name: Jennifer _____

Gender: 2, Age: 27

Location: Santa Cruz, CA 95062, US

Comments: This is really scary. I am pregnant and trying to be as healthy as I can and then something like this comes along and I have no control over protecting myself or my unborn child. I feel like I am in a bad movie, everything about spraying chemicals with several side effects over people without their approval is insane. Please reconsider and use the traps. They are safe .

Signature #1291

Signer's Name: Terri _____

Gender: 2, Age: 43

Location: Capitola, CA 95010, US

Comments: I have a toxin-damaged son with autism who is very sensitive. Please don't spray us!

Signature #1347

Signer's Name: Sage _____

Gender: 2, Age: 45

Location: Santa Cruz, CA 95062, US

Comments: I have a 5 month old baby and I am very angry that this is happening without an EIR. It seems quite unclear that this is an emergency and from what I have read, LBAM has not been used this way. I don't want my child to be a guinea pig! I am also very concerned for the homeless, especially the children. There are no shelter beds, how will they be protected!!! I do appreciate your attention to this, what can we do!?

Signature #1359

Signer's Name: Deborah _____

Gender: 2, Age: 0

Location: Capitola, CA 95010, US

Comments: Please stop the spraying. No one has the right to kill anyone or anything no matter how long it might take. I have asthma and this will be a great health risk for me in the short term. But I worry the most about children and pregnant women not to mention the birds and smaller animals that won't know not to eat or drink outside after 8PM!!!

Comments: I am the grandmother of a 14 pound, 3 month old baby. Does the state know if the compounds that will be sprayed on her will be safe? There are alternatives to spraying! The spraying as scheduled will go on for years. What could be the health consequences for all the children and nursing mothers? This has not been tested.

Comments: I am chemically sensitive and very frightened and concerned about the impact this spray will have on my health and that of the children, animals and older folks, as well as the environment in our area. I realize this is an issue of economic impact, but I believe health, safety and choice come first. This is not an emergency and we should have a full environmental and health assessment before embarking on such an impactful and potentially harmful approach.
