Images of the global effort to defend rivers and human rights  
Exhibit opening and discussion This international collaboration is  
an homage to those to fight to defend rivers and the people who  
depend on them. Though striking imagery by celebrated  
photographers and bilingual documentation, the exhibition charts  
inspiring examples of rivers that have been protected by citizen  
action, and of community-led efforts to provide water for people  
in affordable, sustainable and effective ways. The exhibit opening  
includes a talk led by international water rights activists and  
participating photographers at 6:30 pm.
