

LAUNCHING the FUTURE of ENERGY

AT THE INTERNATIONAL CONFERENCE ON AIRBORNE WIND ENERGY

Register today for the [Airborne Wind Energy Conference 2010](#). The Airborne Wind Energy Consortium's inaugural conference will focus on industry opportunities and challenges, public/private investments and global energy issues.

Key Speakers Include:

Mark Hartney

Program Director
Advanced Research Projects
Agency - Energy

Fort Felker

Director
National Wind Technology
Center, NREL

Ken Caldeira

Senior Scientist
Department of Global Ecology,
Stanford University

Elizabeth Lynn Ray

Director
Airspace & Aeronautical
Information Management, FAA

Ira Ehrenpreis

General Partner
Technology Partners

Saul Griffith

Chief Scientist
Other Lab

Mark Moore, NASA

Cristina Archer, CSU Chico
Will Coleman, Mohr Davidow Ventures
Mario Milanese, Politecnico di Torino
Miles Loyd, Lawrence Livermore

Uday Mathur, PG&E

Catherine Wolfram, UC Berkeley

Mark Jacobson, Stanford University

Michael Kanellos, Greentech Media

Pedram Mokrian, Mayfield Fund

Who Will Attend:

- Technology Developers
- Federal Agencies
- Students
- Utilities
- Academic Researchers
- Policy Makers
- Venture Capitalists
- Project Developers
- Energy Entrepreneurs

The conference provides an interactive forum for the world renewable energy community to discuss current and emerging airborne wind energy technologies and foster collaborative partnerships with leading researchers.
