Join Lawrence Jarach, an editor for *Anarchy: A Journal of Desire Armed*, for a night of discussion and exploration of the Spanish Revolution of 1936. Anarchism in Spain grew from a small group of militants into a mass working class movement that rose up against a fascist coup and launched a social revolution. Workplaces were taken over, buildings were occupied, and in the country side, money was even abolished in some communities. Drawing from a wealth of knowledge, Lawrence will discuss how anarchists in Spain struggled, lived, and related to other people. Refreshments will be on hand, as well as free literature and good times!
