

Since the 1990s, we have repeatedly asked the FDA, the USDA, our legislators and the courts to label foods containing genetically modified organisms. So far they haven't.

It's time for the people of California to vote on labeling genetically engineered foods.

It's Our Right to Know

A 2012 Ballot Initiative Campaign

We need to be ready to meet state guidelines and timelines to get this on the ballot.

We are organizing NOW to gather signatures THIS FALL.

WHAT CAN YOU DO NOW?

SPREAD THE WORD

-Tell Friends, co-workers, groups, organizations, churches, etc.

-Join our Facebook page via our site

www.labelgmos.org

and get the word out around the world.

This is a California initiative but what we do here will impact the whole country.

This is a people powered movement that is growing because of our connections.

JOIN THE TEAM

We are building exponentially and we need all the expertise we can get. Visit the site to see what we want to create and if you see yourself wanting to . Let us know if you have needed skills we haven't identified yet.

DONATE

We are a grassroots movement and need everyone's support, the large and the small. Let's not forget that the last presidential election was won by millions of small donations. Initiatives are very expensive. Those who want to see a labeling vote fail have tremendous resources to try and silence us.

Let's not let that happen.

VOLUNTEER

Sign The Pledge To

Gather Signatures For This Fall:

www.labelgmos.org/pledge

Be a worker bee in your community or sign up to be a point person for your county.

-Visit the site to find out other ways to join us make GMO history.
