

Adrift in the Wake of Kyoto

*A report-back from the Durban climate talks w/ **Andy Katz***

Thursday, January 26 ,2012
7pm - 9pm

The science is clear but there is a serious disconnect with the pace world negotiations are taking to secure a global agreement to reduce greenhouse gas emissions and prepare for the grave threats posed by climate change.

Join **Andy Katz**, Sierra Club delegate to the recent UN climate negotiations in Durban and EBMUD Director, for a report-back and conversation about the state of the negotiations. Come hear about the importance of our state and local work for climate protection and where clean energy and jobs fit in.

Following a talk and Q&A, we'll engage in discussion about state and regional climate issues and how we can be effective locally in the face of international inertia.

Location: 2530 San Pablo Avenue (near Dwight Way), Berkeley, CA 94702

Cost: Free
