

Climate Immersion:

An Introductory Series

3 Sessions, 3 days
March 19th, 24th, 30th

In this three-session intro series we'll explore the many layers of climate solutions, from urban farms to personal action plans. A perfect fit for those wanting to develop basic knowledge about climate change, gain exposure to models of successful community solutions, and build relationships with other engaged members.

Session 1: Nuts and Bolts - Gather with a small group of community members to swap information, resources, and solutions for taking action on climate change.

Session 2: Field Day - Work party and potluck at Urban Adamah -- a one acre farm and educational center, in Berkeley. We'll be seeding, transplanting, weeding, preparing beds, cutting winter cover crops and checking out the farm's greenhouses, chickens, bees, teaching tents, and more!

Session 3: EcoHouse Climate Mitigation and Adaptation Tour - Draw inspiration from a survey of do-it-yourself projects such as our living roof; our ground-breaking constructed wetlands and simple laundry greywater systems; a 1100 gallon rainwater cistern; a native rain garden and more.

Participation in all three sessions is required. Dates, Times and Locations for this series are listed below and there are more details on our webpage, www.ecologycenter.org

Time: Session 1: Tue, 3/19 6:30-8:30pm at the Ecology Center; Session 2: Sun 3/24 2-5pm at Urban Adamah; Session 3: Sat 3/30 11am-1pm at Ecohouse

Cost: Free. Pre-registration ensures a spot

Registration: register@ecologycenter.org
