Defend OSHA Whistleblowers-Rehire Federal Attorney Darrell Whitman Who Is Defending Workers Fighting For Our Health And Safety

EVENT: 2/27 SF Press Conference And Rally

Friday February 27, 2015 4:00 PM
7th And Mission St.
San Francisco, California

OSHA Federal Attorney Darrell Whitman is one of only 3 attorneys in the 9th Region of OSHA protecting health and safety for whistleblowers. This region covers nearly 40 million workers. Whitman has been fighting the systemic violation of the rights of OSHA whistleblowers. He has challenged the systemic corruption in at OSHA and the DOL top management which not only refuses to enforce the law but has allowed some managers to falsify federal documents and illegally suppress the rights of whistleblowers. This is not only a worker issue but the right of the public and communities to be protected on the highways with trucks, on the railways, airlines, at oil refineries, nuclear plants and even our health and safety in buildings and other work and industrial sites.

As a result of fighting for whistleblowers, Whitman himself has come under attack being bullied and threatened for following the law. This press conference will report on this case and also the connection to the workers and communities in the bay area and the nation.
