Master of Space: Corporate plans for the militarization and privatization of space

The gold rush is now underway as space technologies have matured to the point where mining the sky for precious resources becomes possible. Corporate forces intend to use the newly formed 'Space force' to guard the front gate on and off Earth to ensure that only 'authorized' companies and nations would be allowed to access space.

Our speaker, **Bruce Gagnon** is the Coordinator (and Co-Founder) of the Global Network Against Weapons & Nuclear Power in Space. He is a Vietnam war-era veteran and began his organizing work with the United Farm Workers Union. He lives in Bath, Maine

About Sunday Morning at the Marxist Library

A weekly discussion series inspired by our respect for the work of Karl Marx and our belief that his work will remain as important for the class struggles of the future as they have been for the past.
