

NO WAR IN UKRAINE.

Congress's most recent funding package represents an escalation in the proxy war with Russia. We say no more!

WHAT WE SEE

Despite promising just two months ago to "work relentlessly toward de-escalation" of the war in Ukraine, California Congresswoman Barbara Lee voted in lockstep with every Democrat in Congress behind President Biden's war policy without voicing such questions or concerns and without a single mention of diplomacy or de-escalation.

WHAT WE WANT FROM LEE

- Vote NO on the next weapons supplemental for Ukraine and support oversight hearings on prior weapons shipments.
- Urge President Biden to back a negotiated settlement that recognizes the security interests of all stakeholders and to lift key sanctions in return for concessions from Russia.
- "Work relentlessly for de-escalation" and not for more war.
